

Innovation Pipeline Playbook: Category-by- Category Implementation Guide

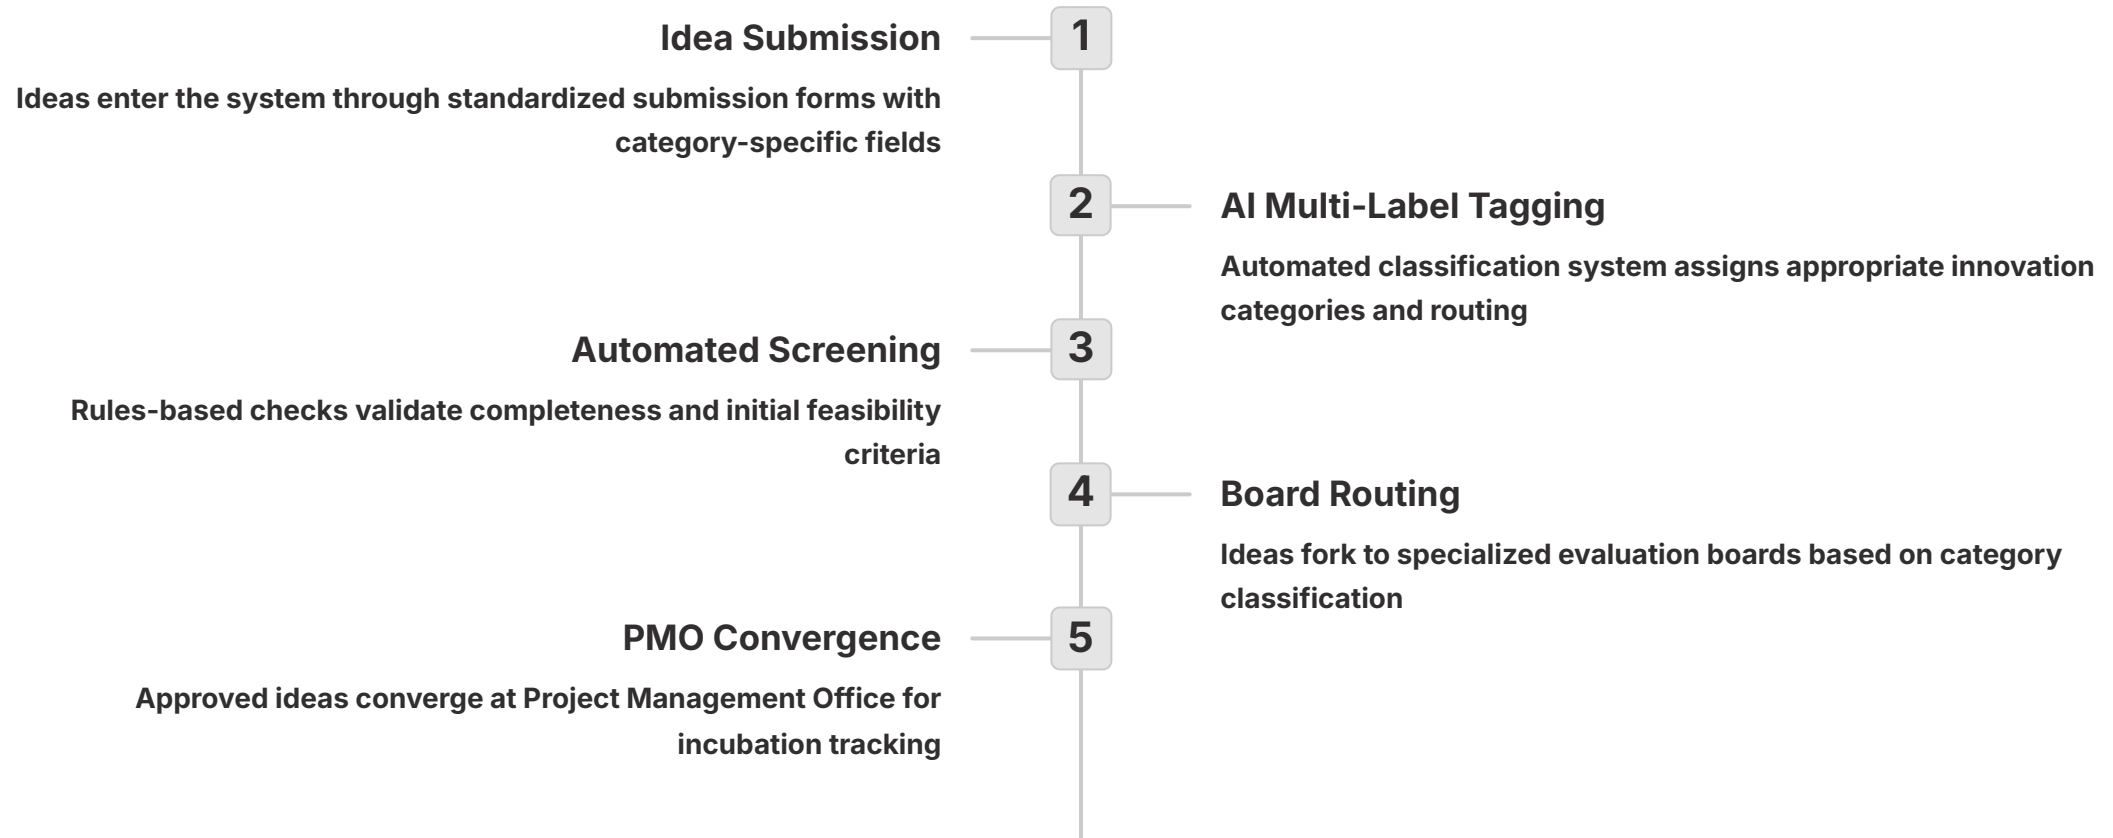

This comprehensive playbook provides innovation managers and process improvement specialists with detailed implementation frameworks for 26 distinct innovation categories. Each category follows a structured five-stage pipeline: Capture, Screen, Evaluate, Approve, and Incubate, with specialized configurations optimized for specific innovation types.

The playbook establishes standardized governance while maintaining flexibility for category-specific requirements. From product innovation requiring roadmap integration to sustainability initiatives demanding ESG compliance, each framework includes precise evaluation criteria, approval thresholds, and KPI tracking mechanisms.

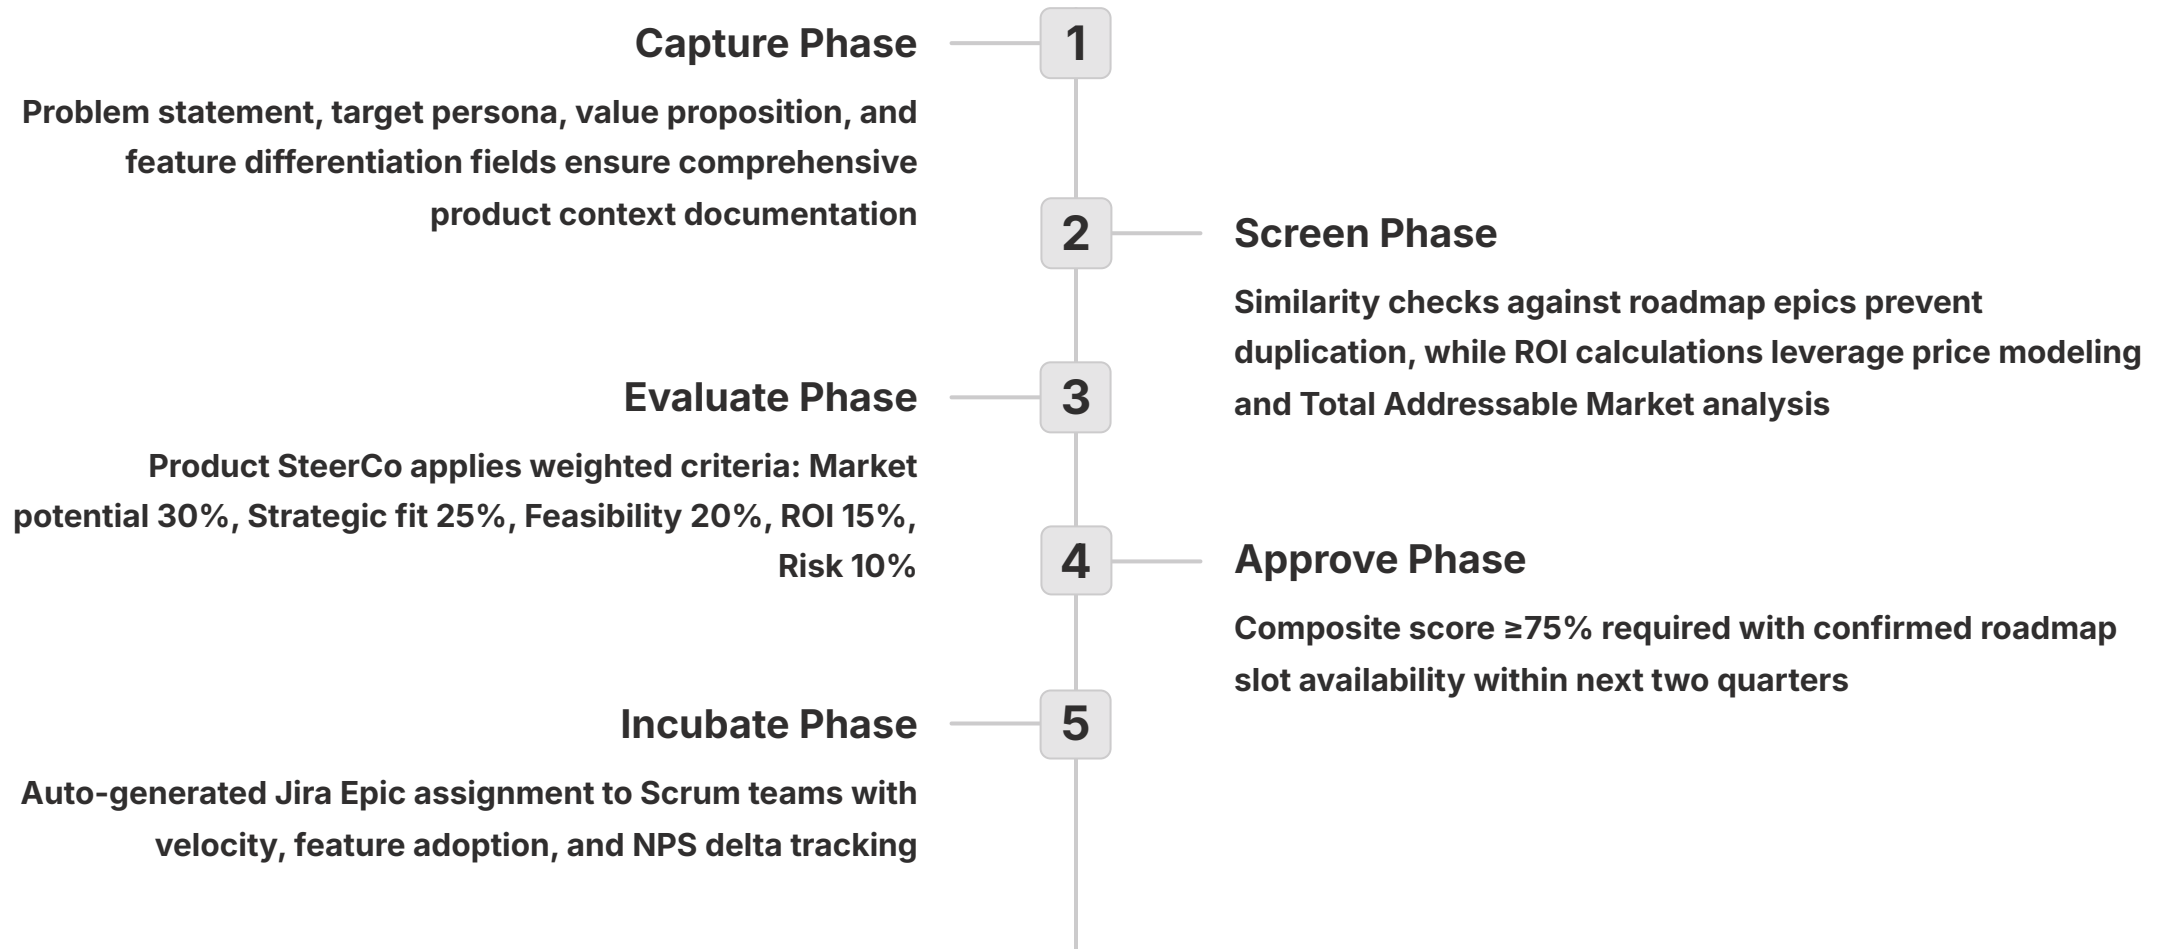

Baseline Pipeline Logic

This foundational logic ensures consistent processing while enabling category-specific specializations. The AI tagging system reduces manual sorting overhead by 85%, while automated screening filters out incomplete submissions before human evaluation. Board routing ensures domain expertise application, and PMO convergence maintains portfolio visibility across all innovation streams.

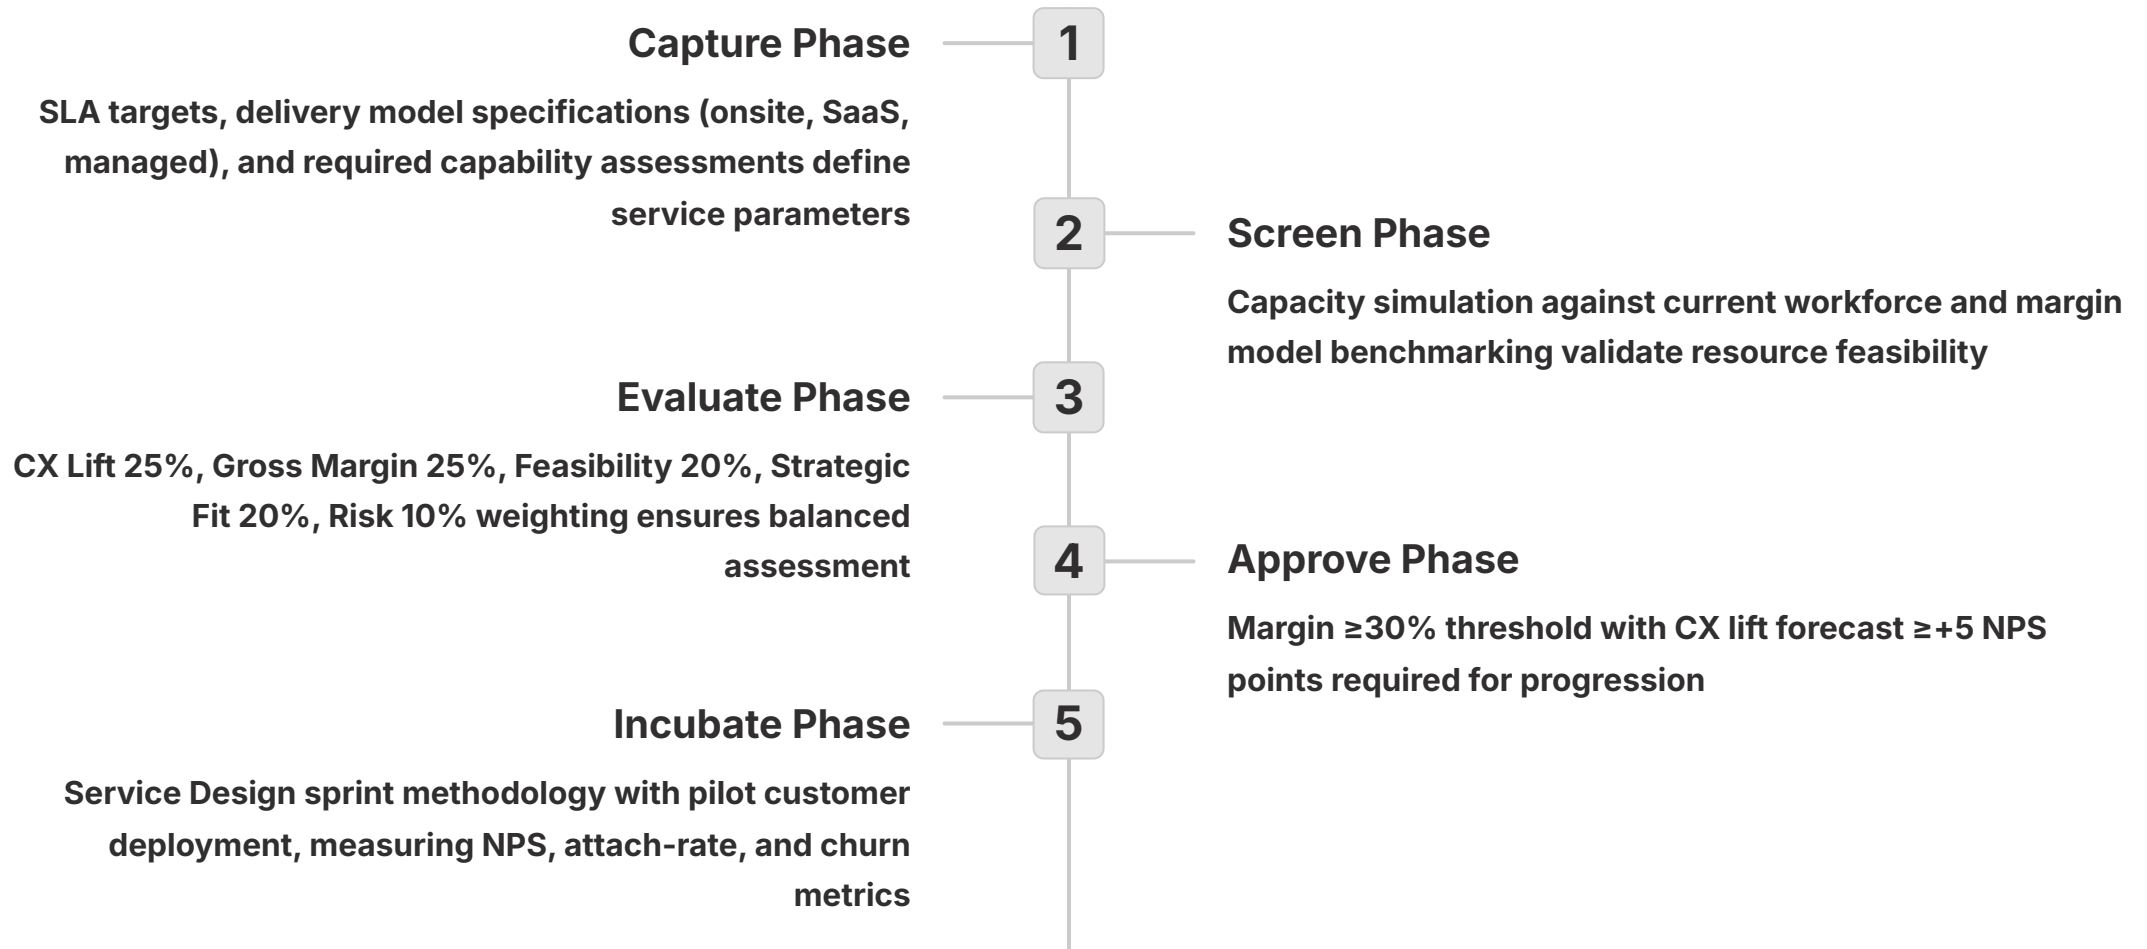

Product Innovation Pipeline

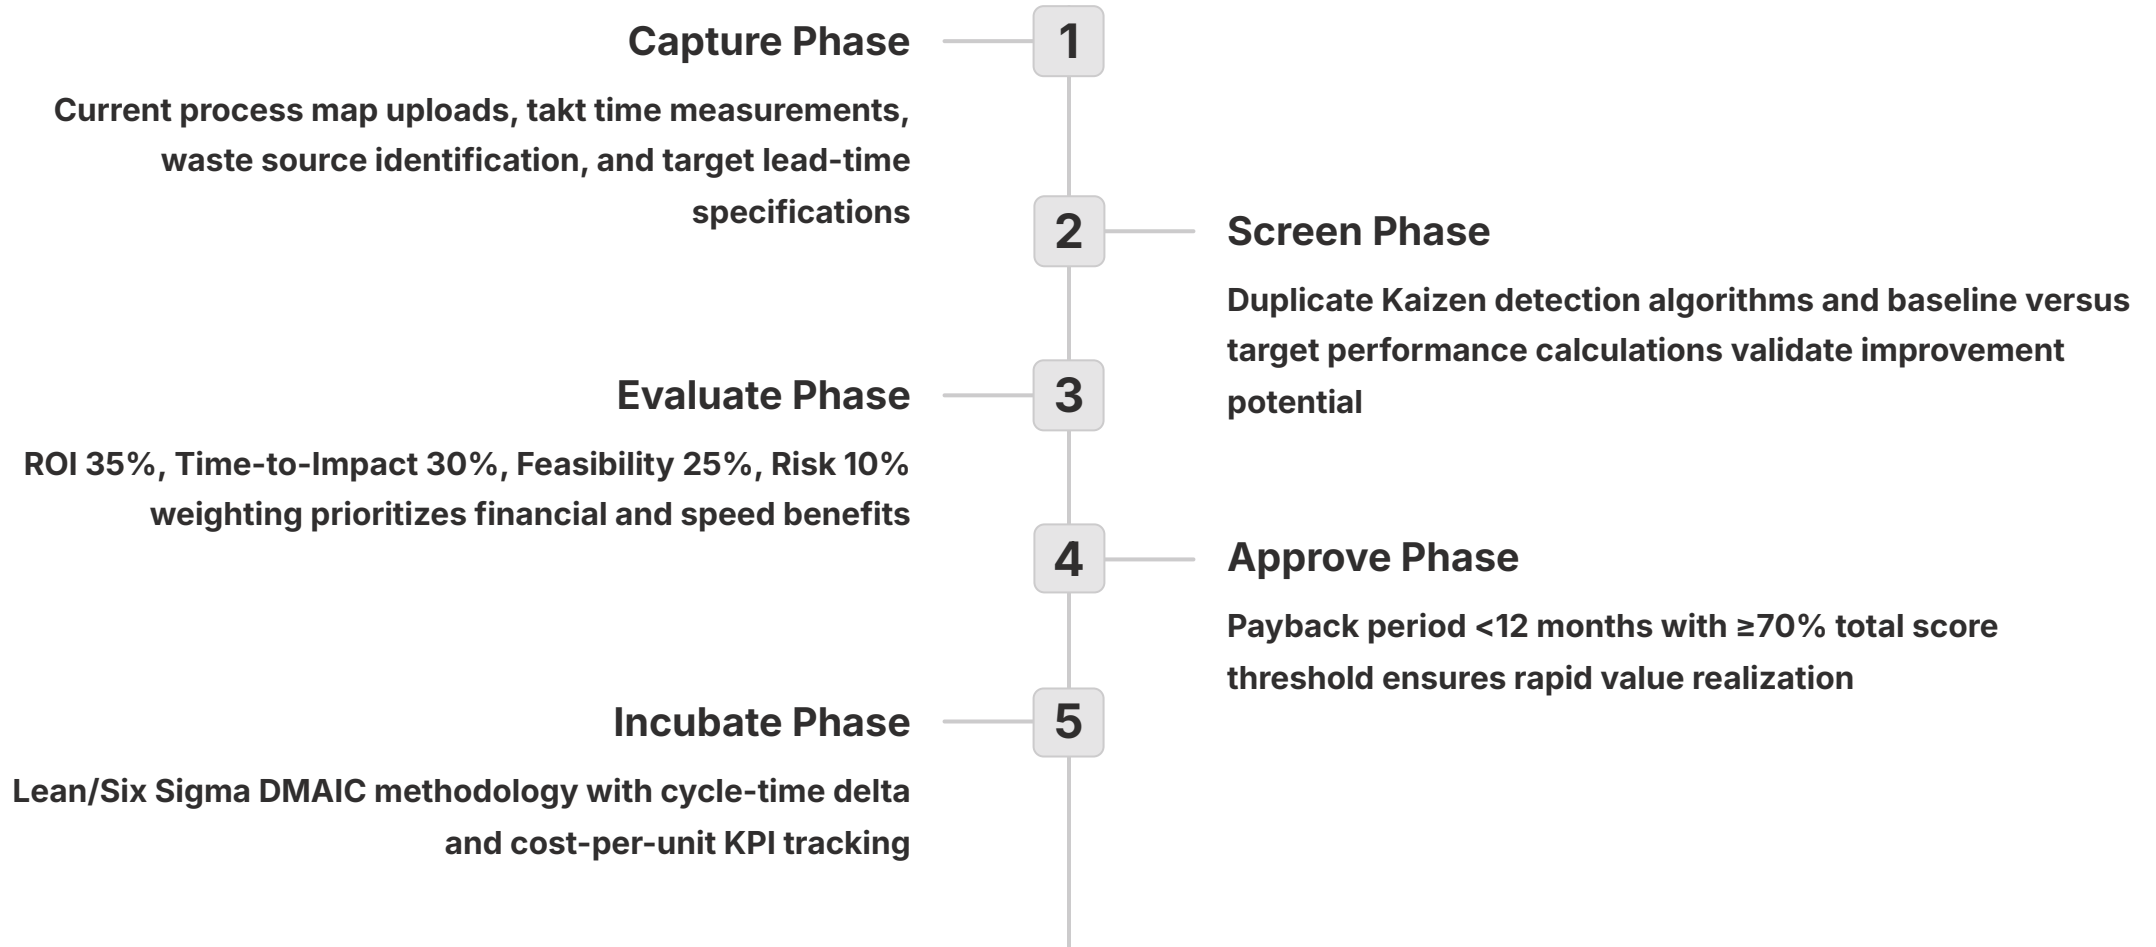

Service Innovation Pipeline

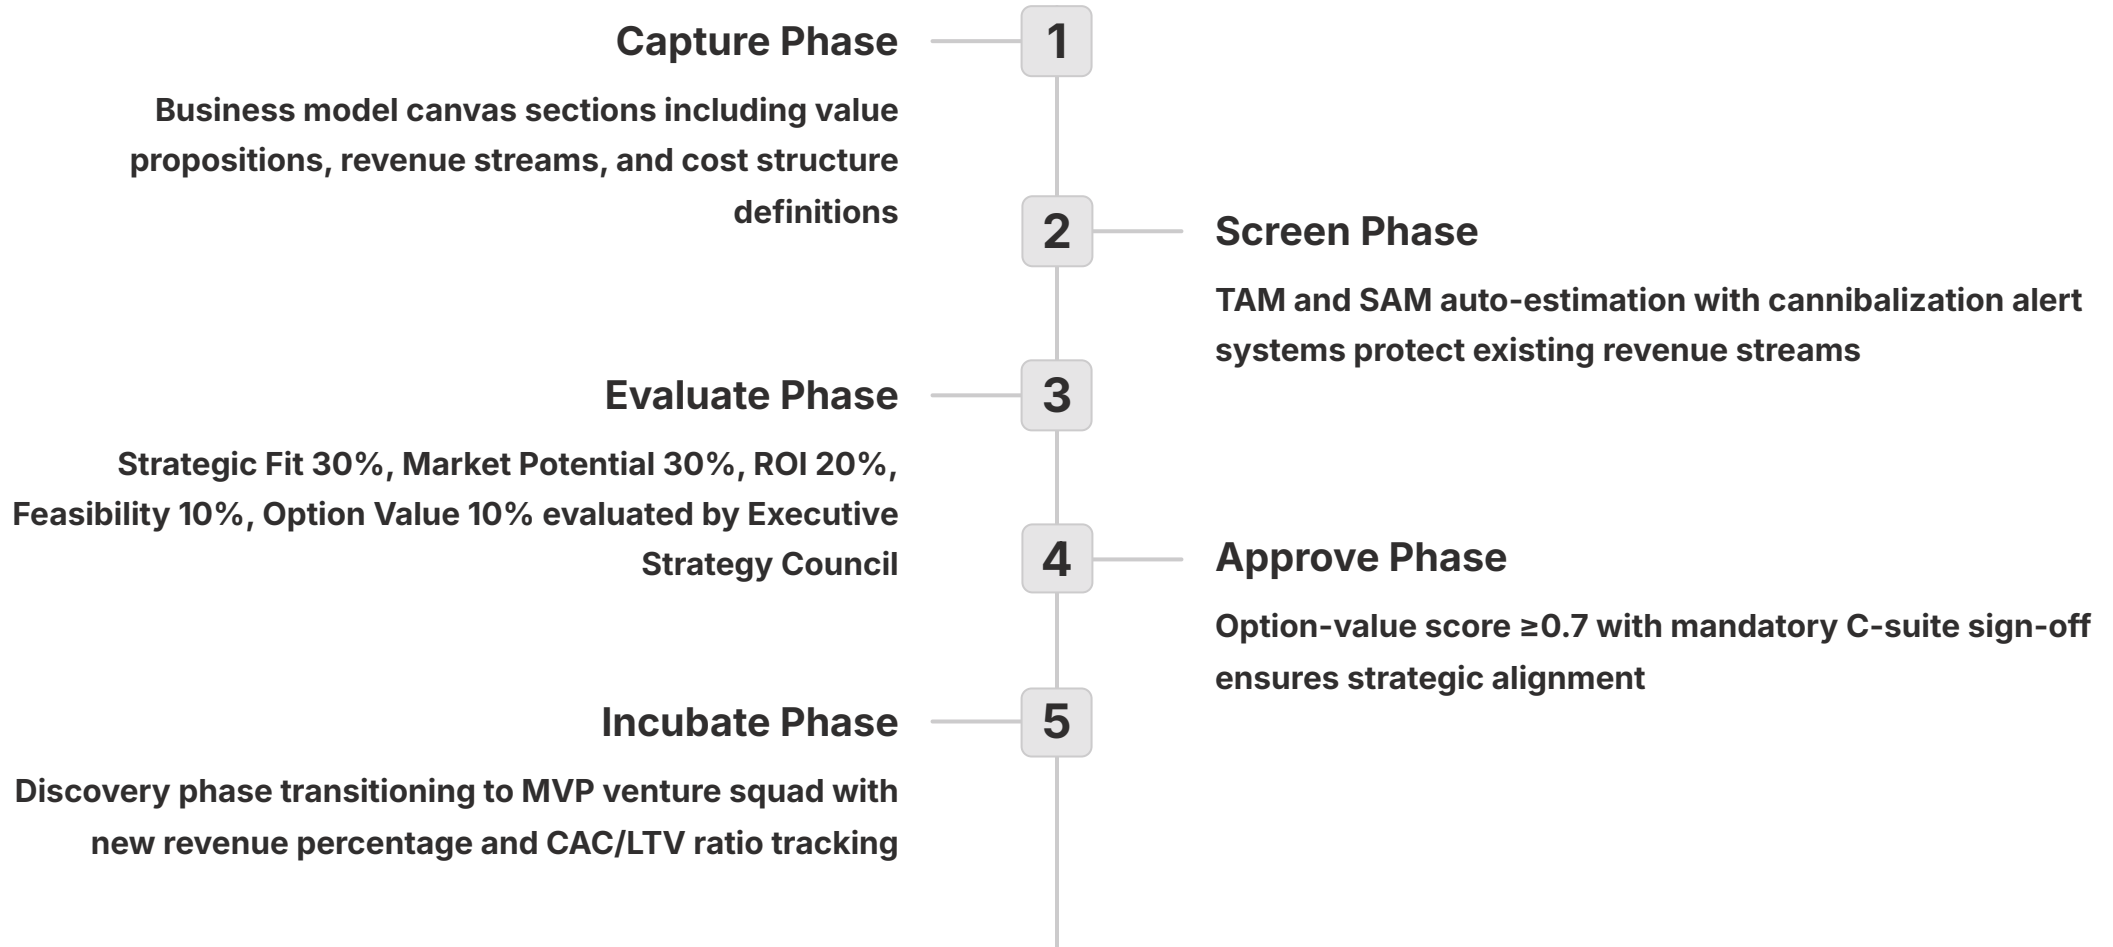

Process Innovation Pipeline

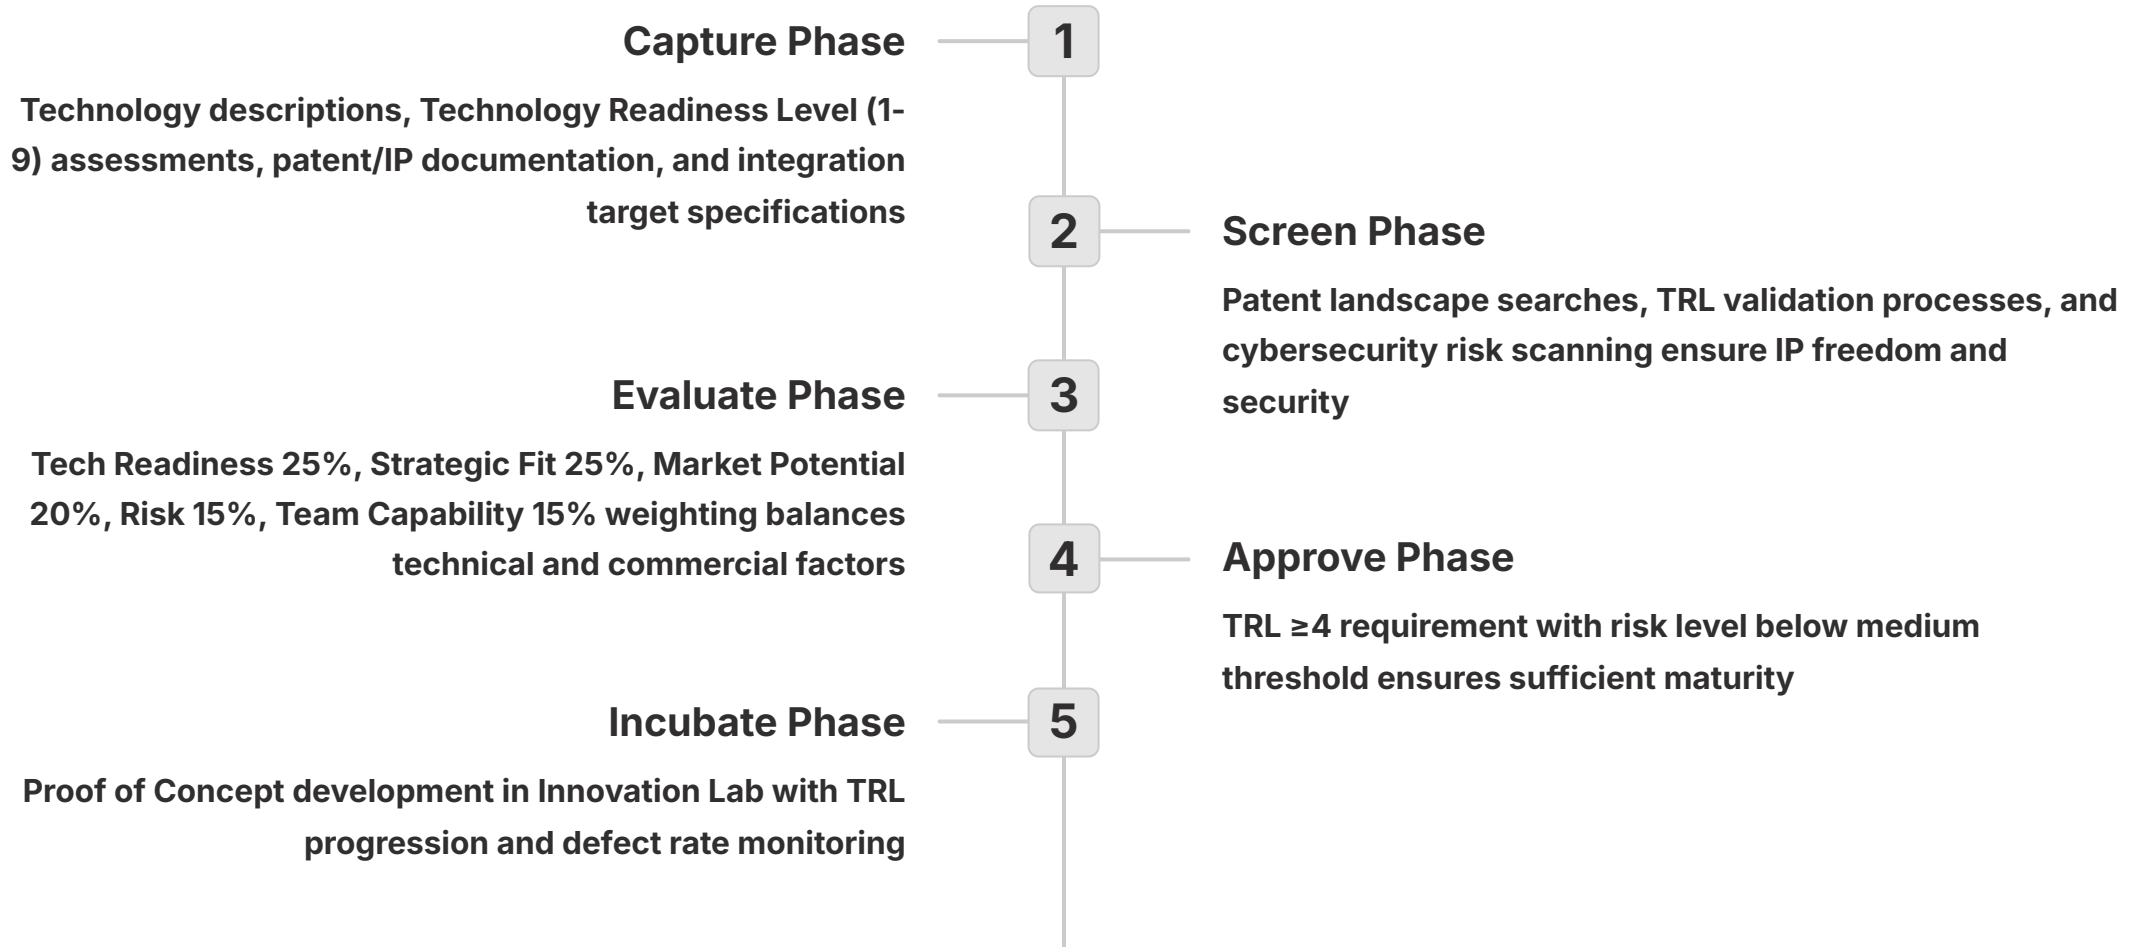

Business Model Innovation Pipeline

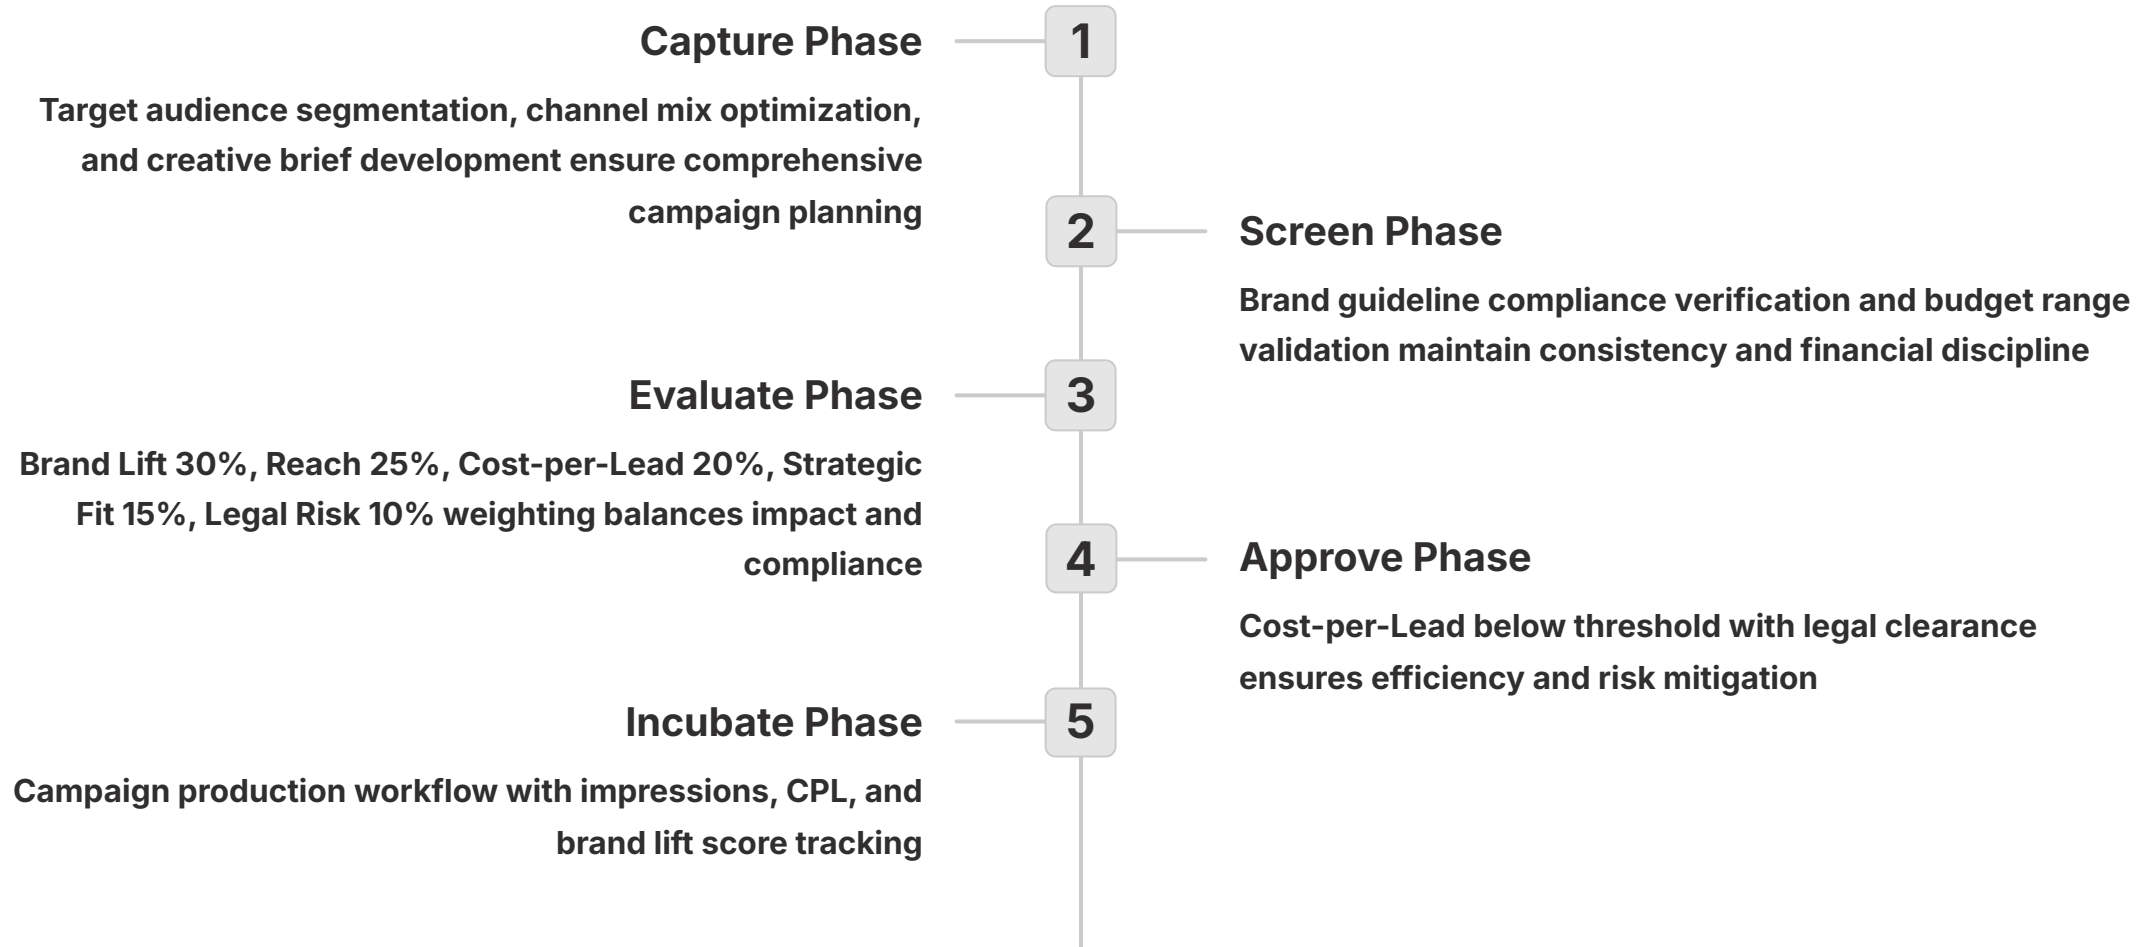

Technological Innovation Pipeline

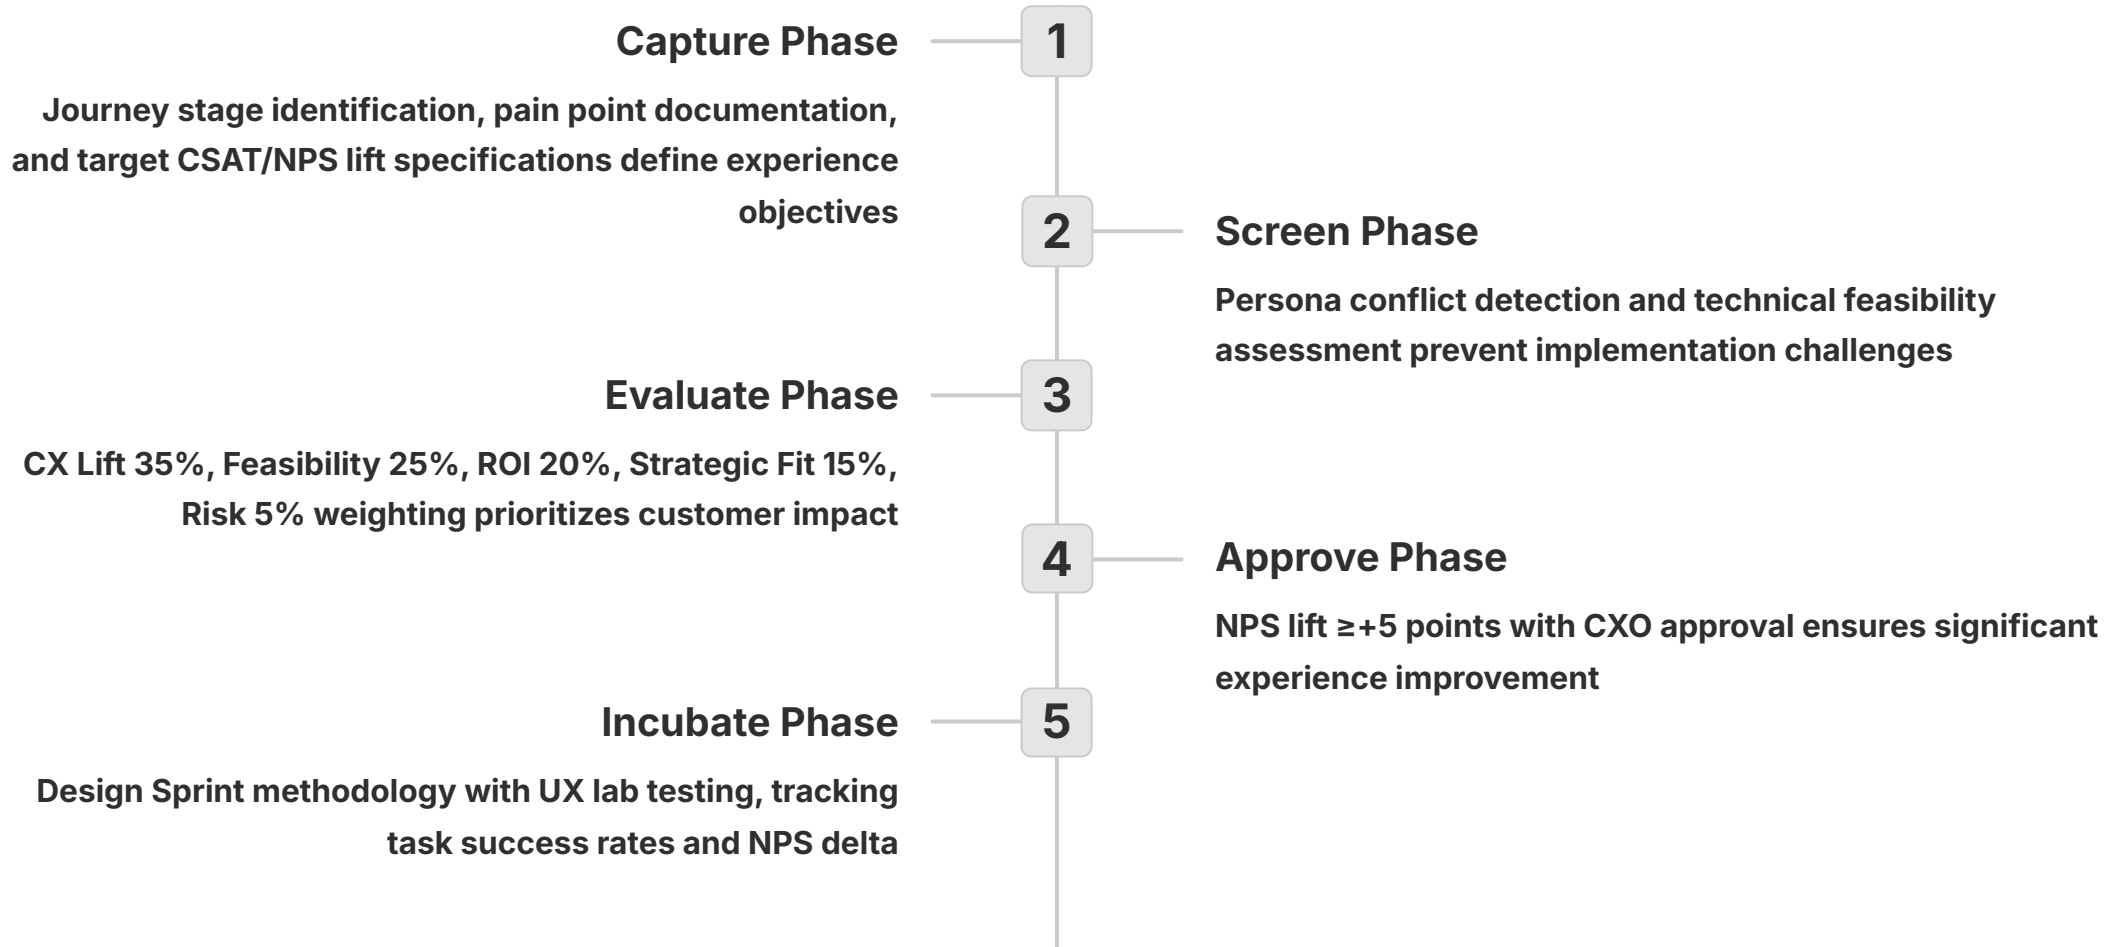

Marketing Innovation Pipeline

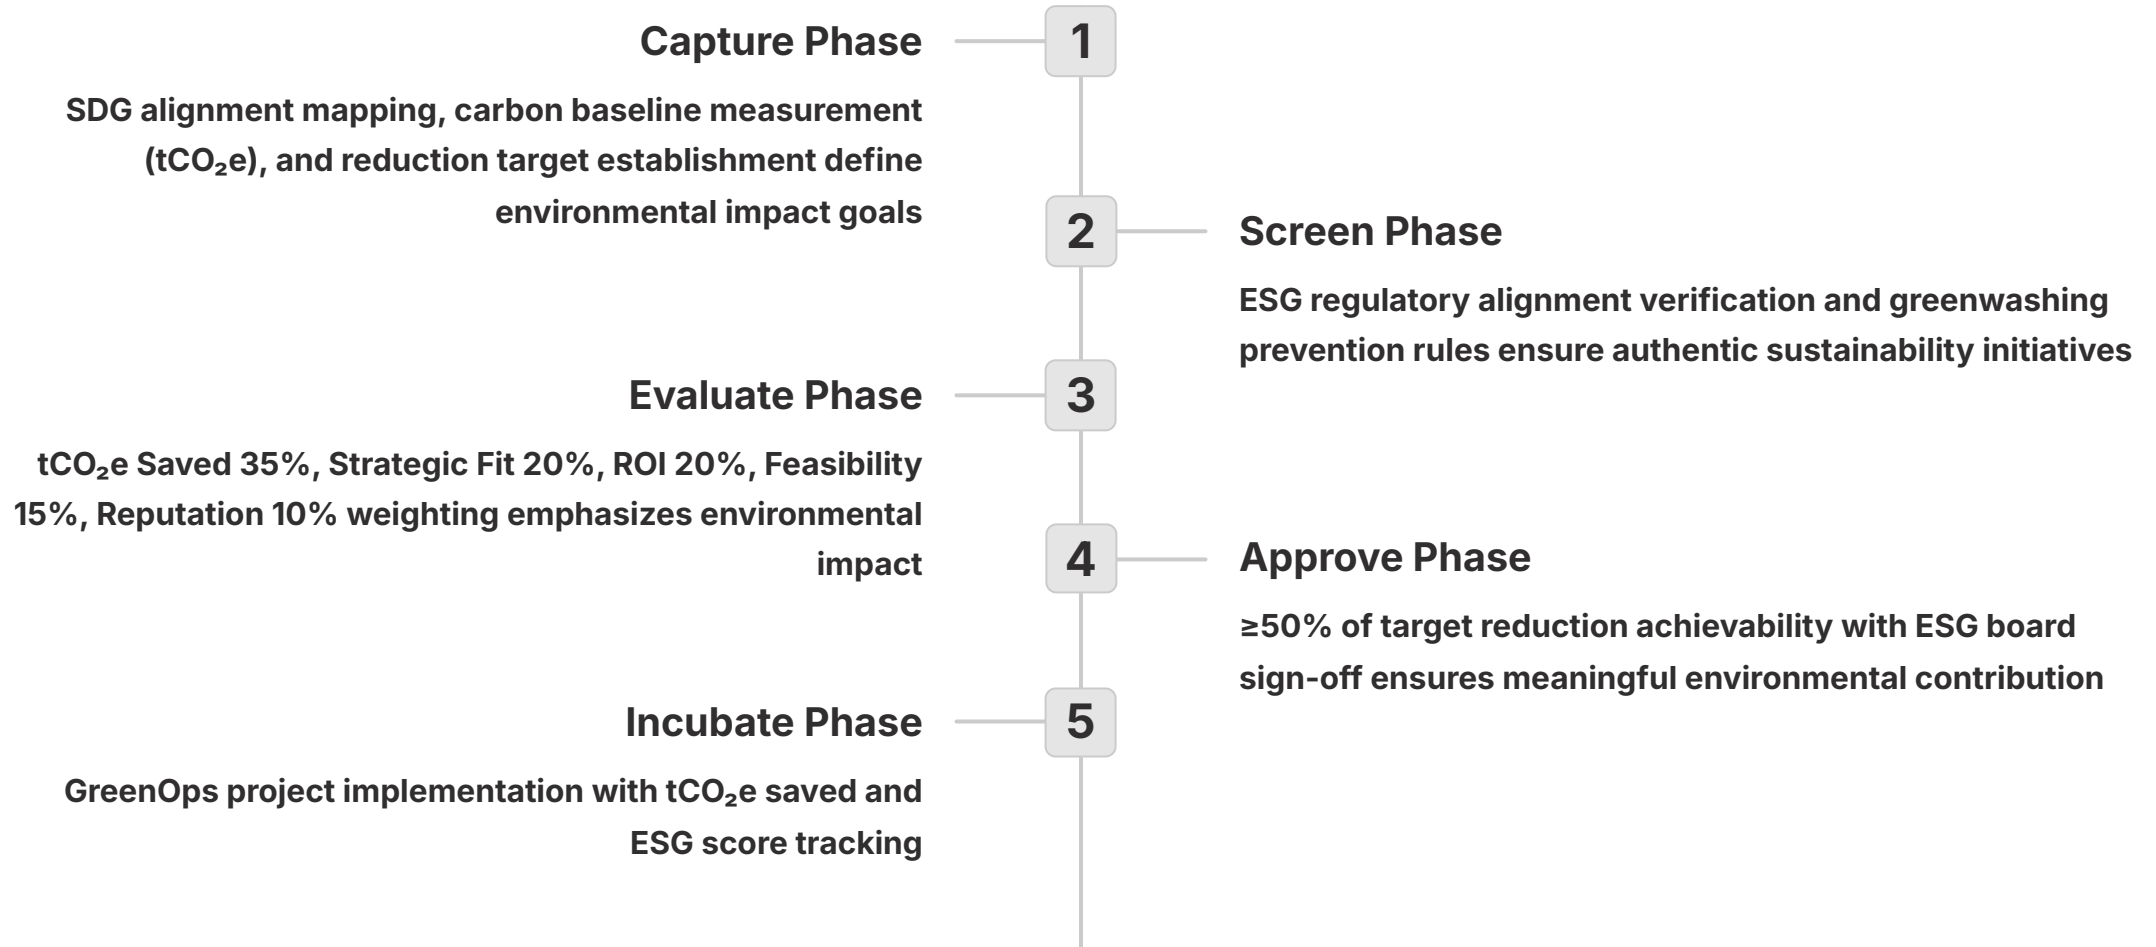

Customer Experience Innovation Pipeline

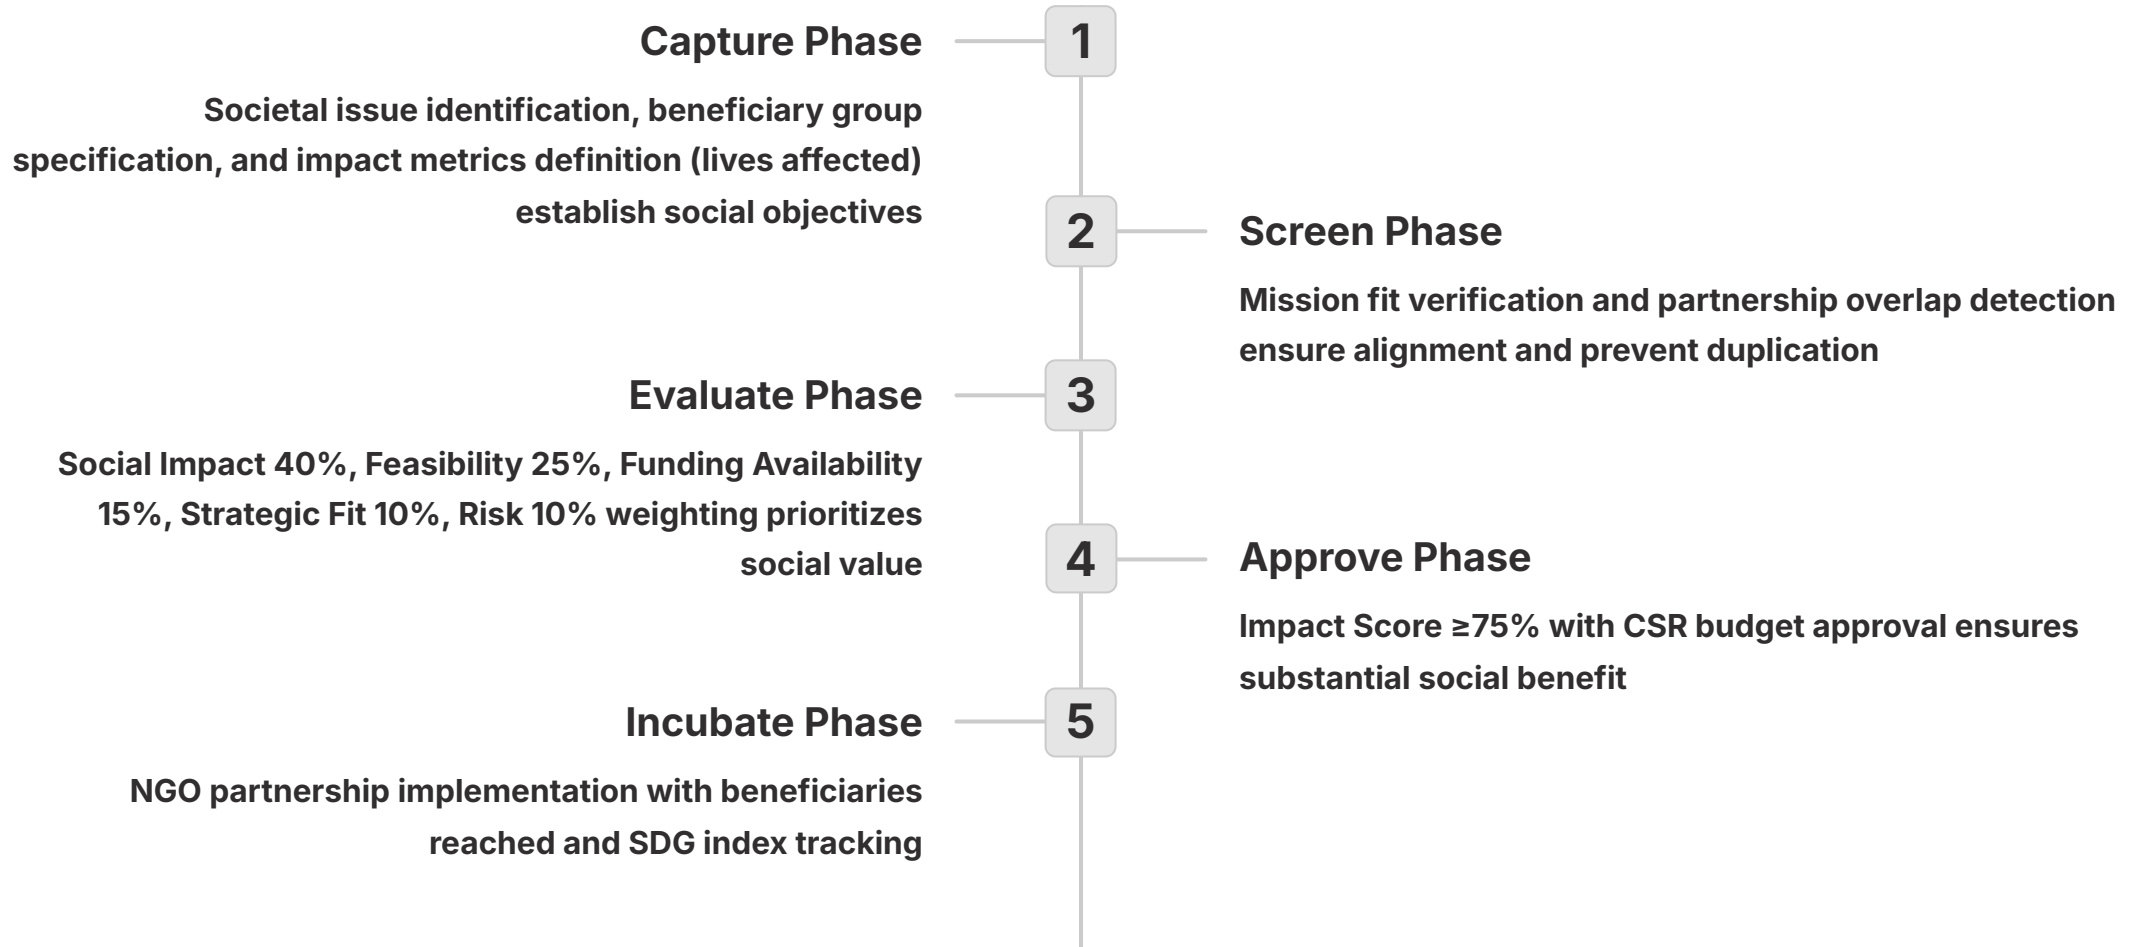

Sustainability Innovation Pipeline

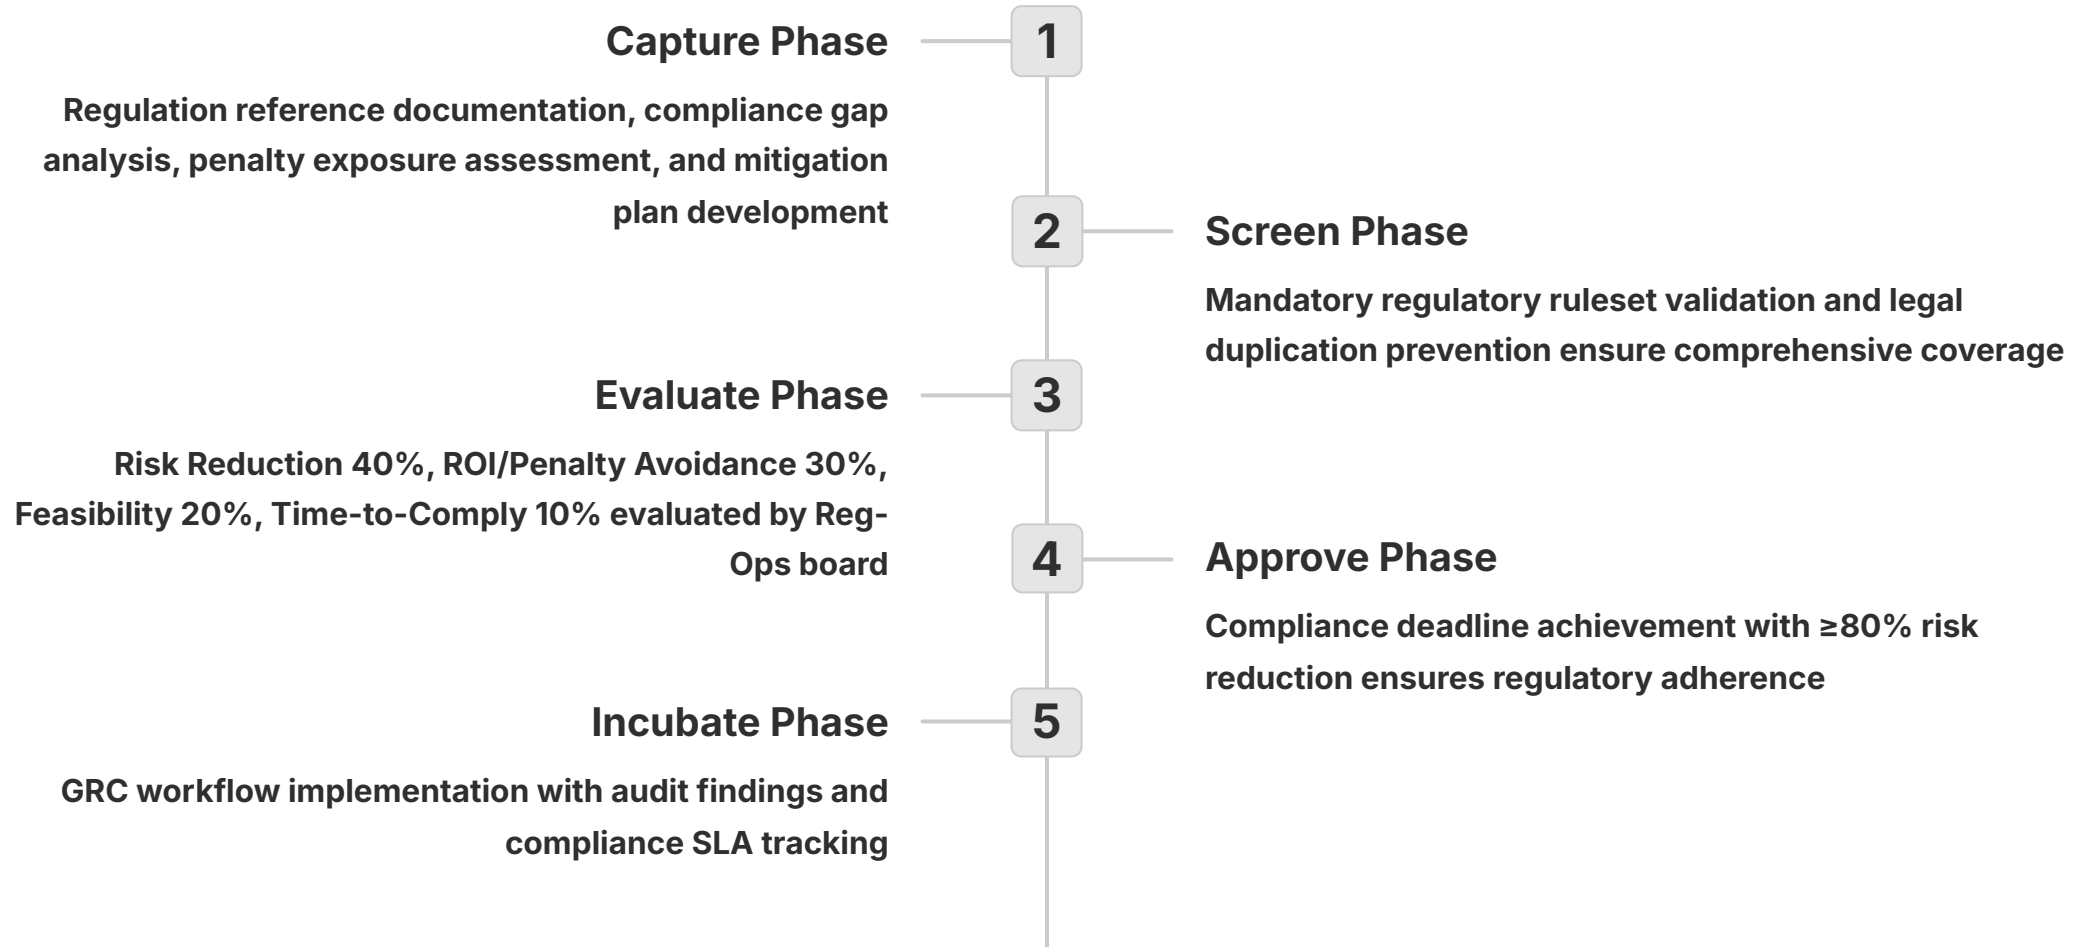

Social Innovation Pipeline

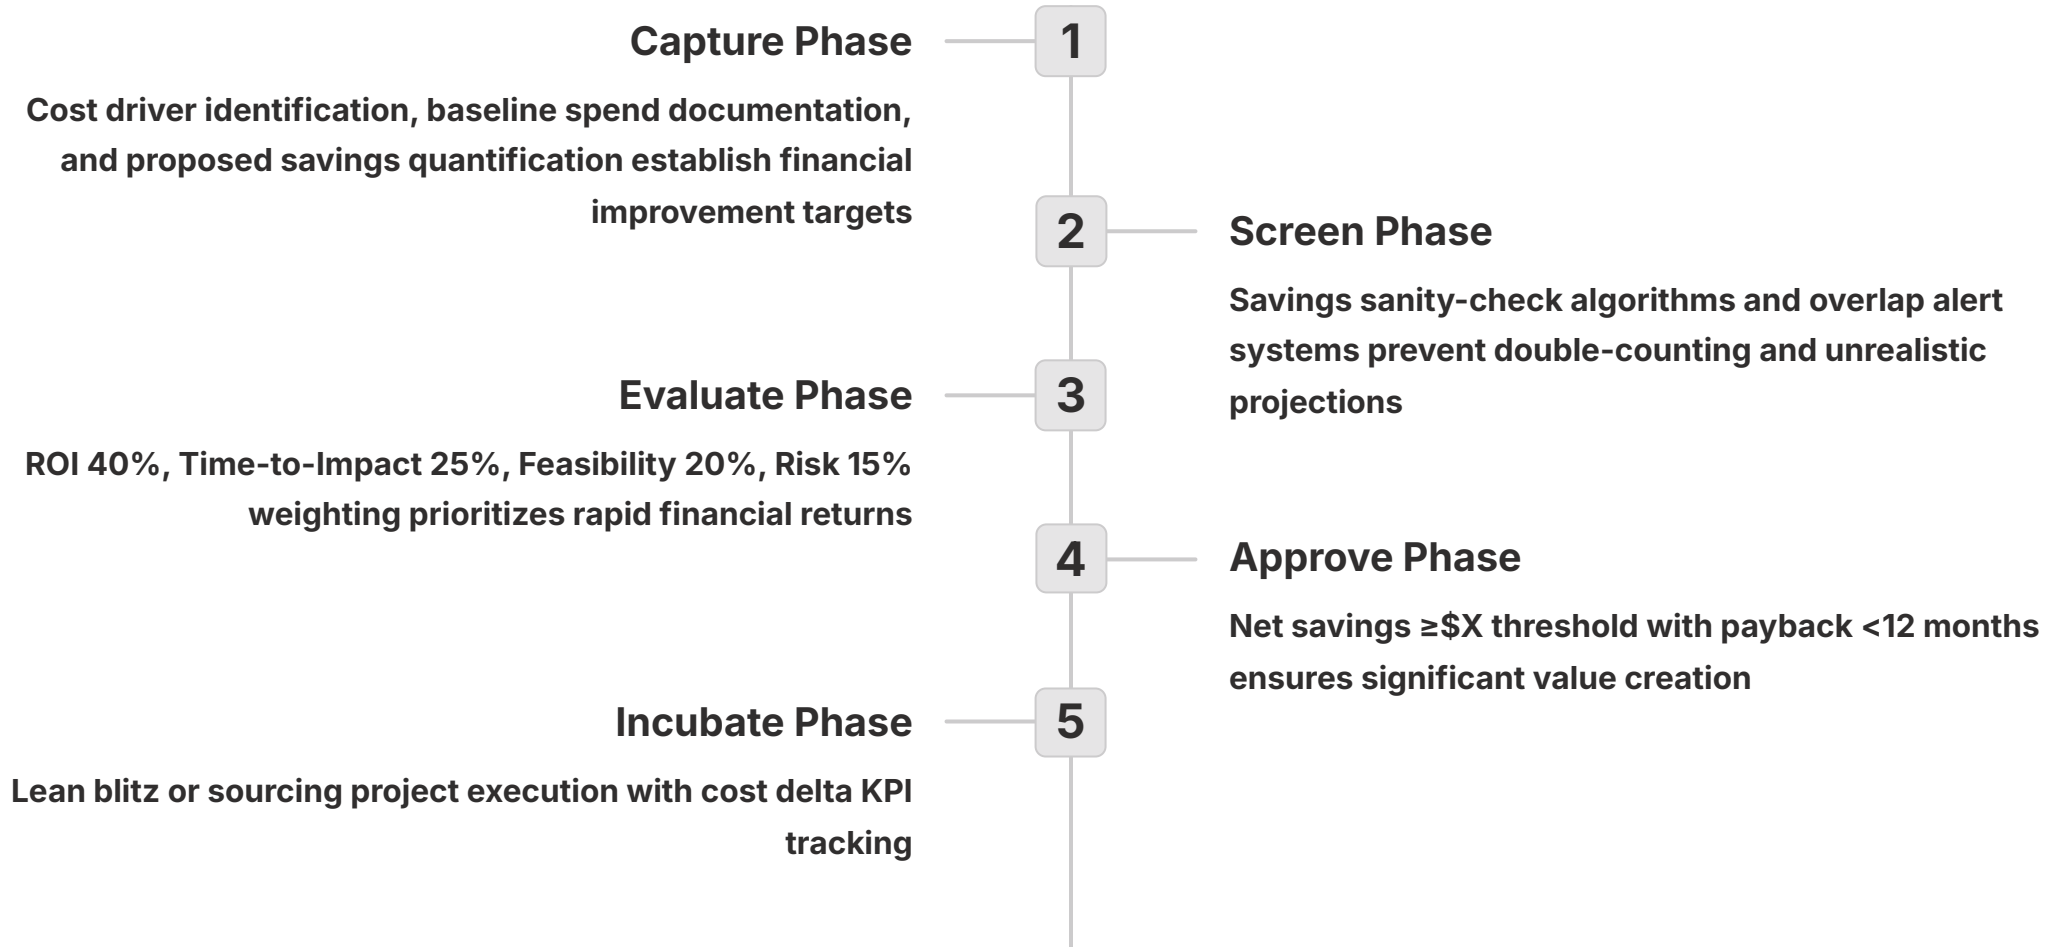

Regulatory & Compliance Innovation Pipeline

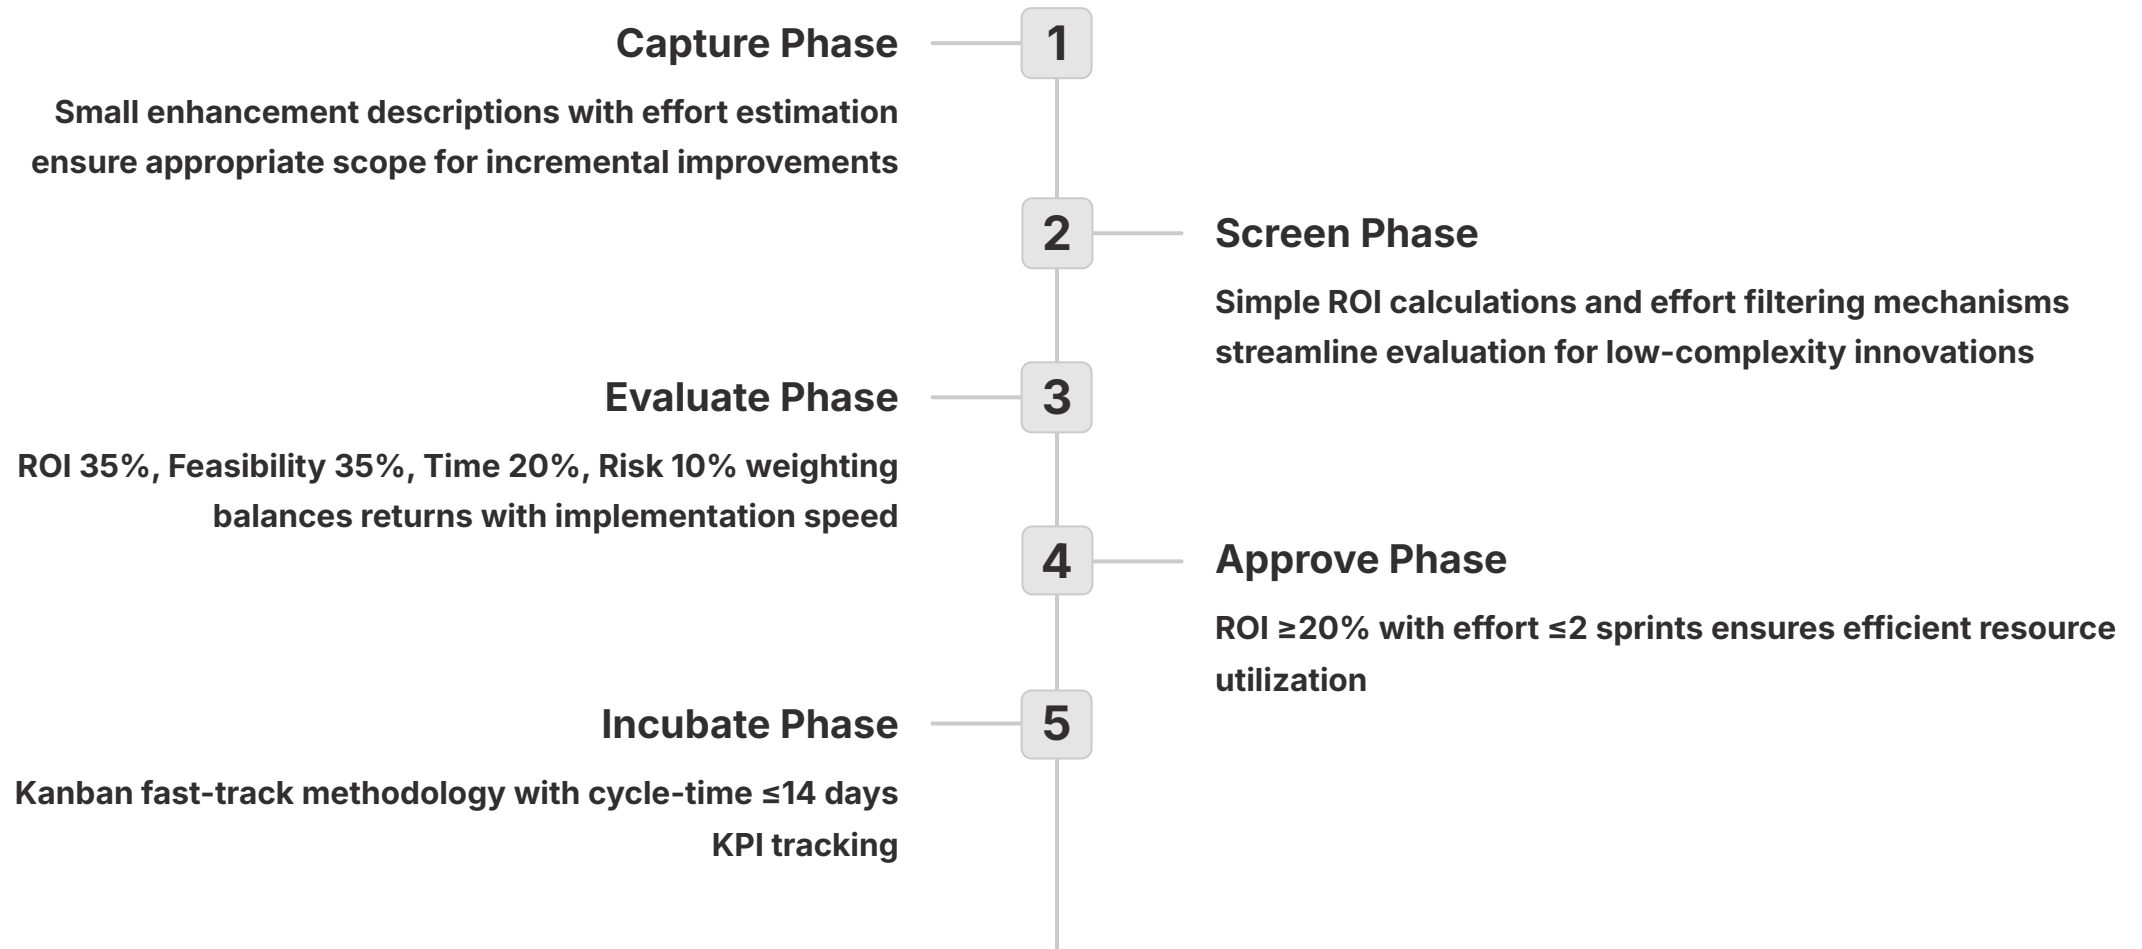

Efficiency & Cost Reduction Pipeline

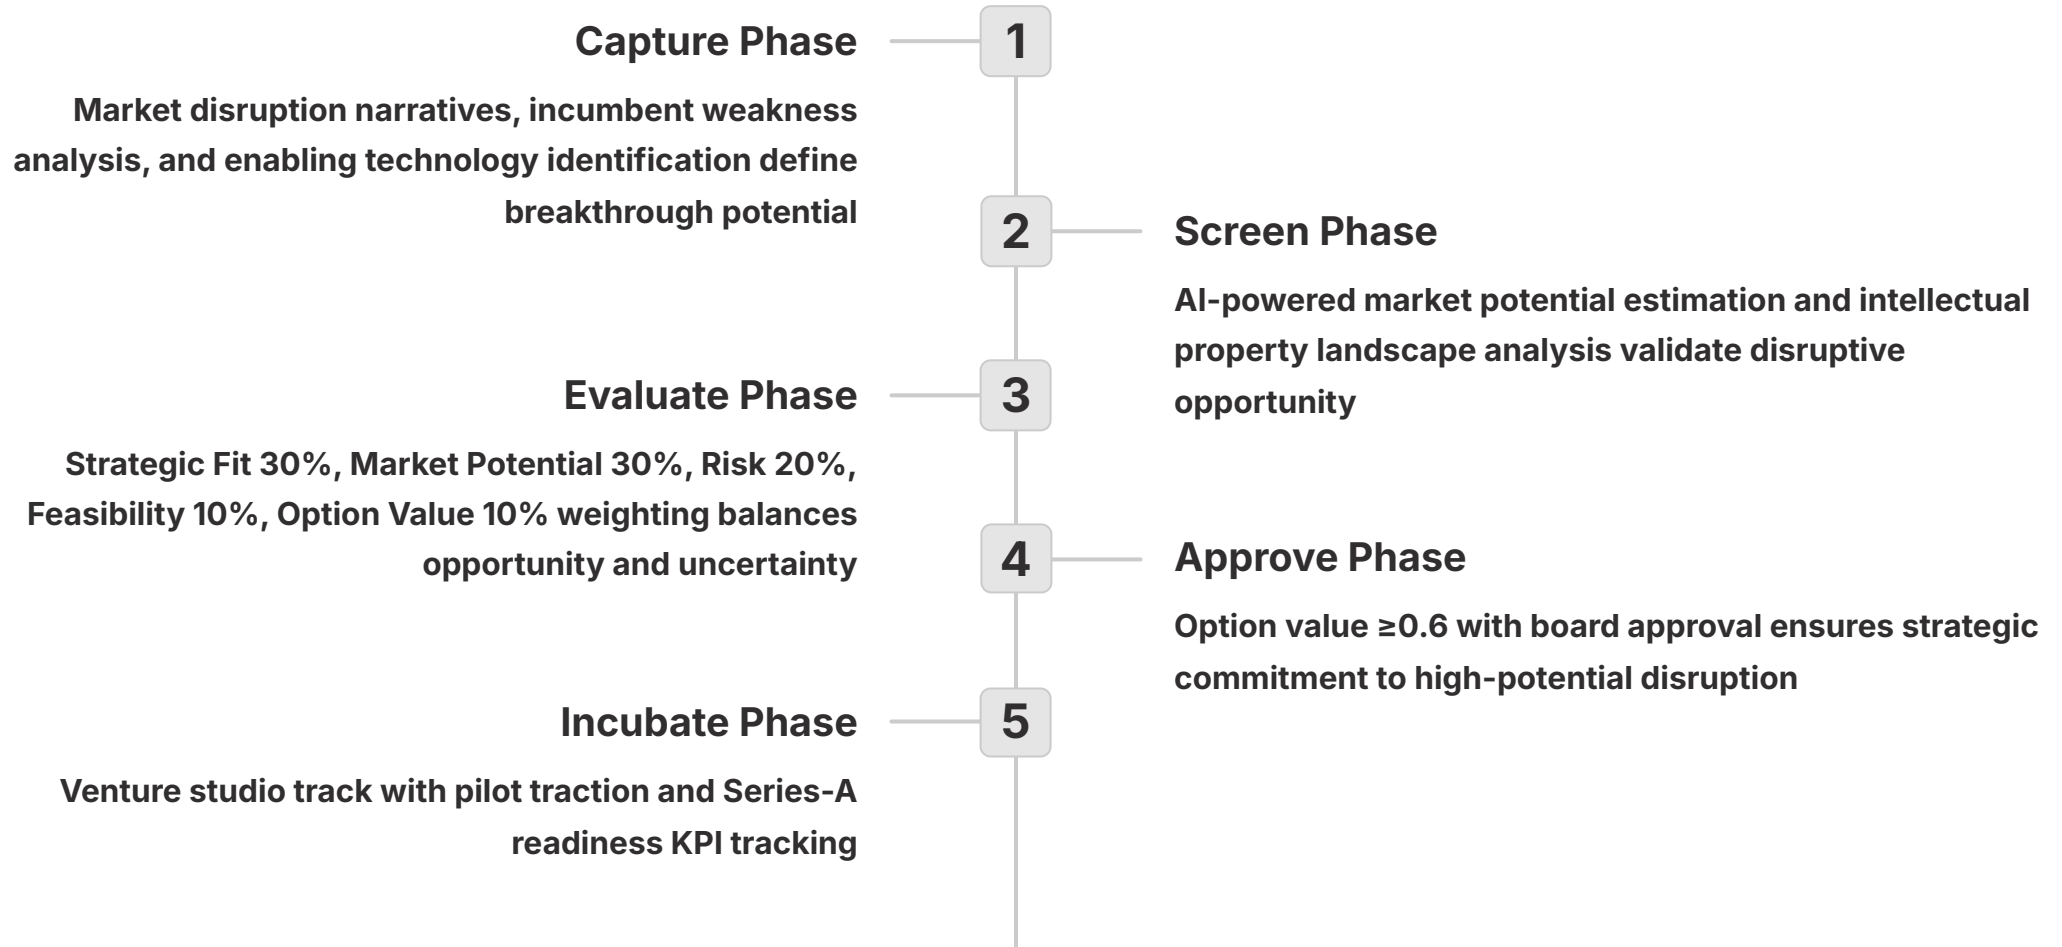

Incremental Innovation Pipeline

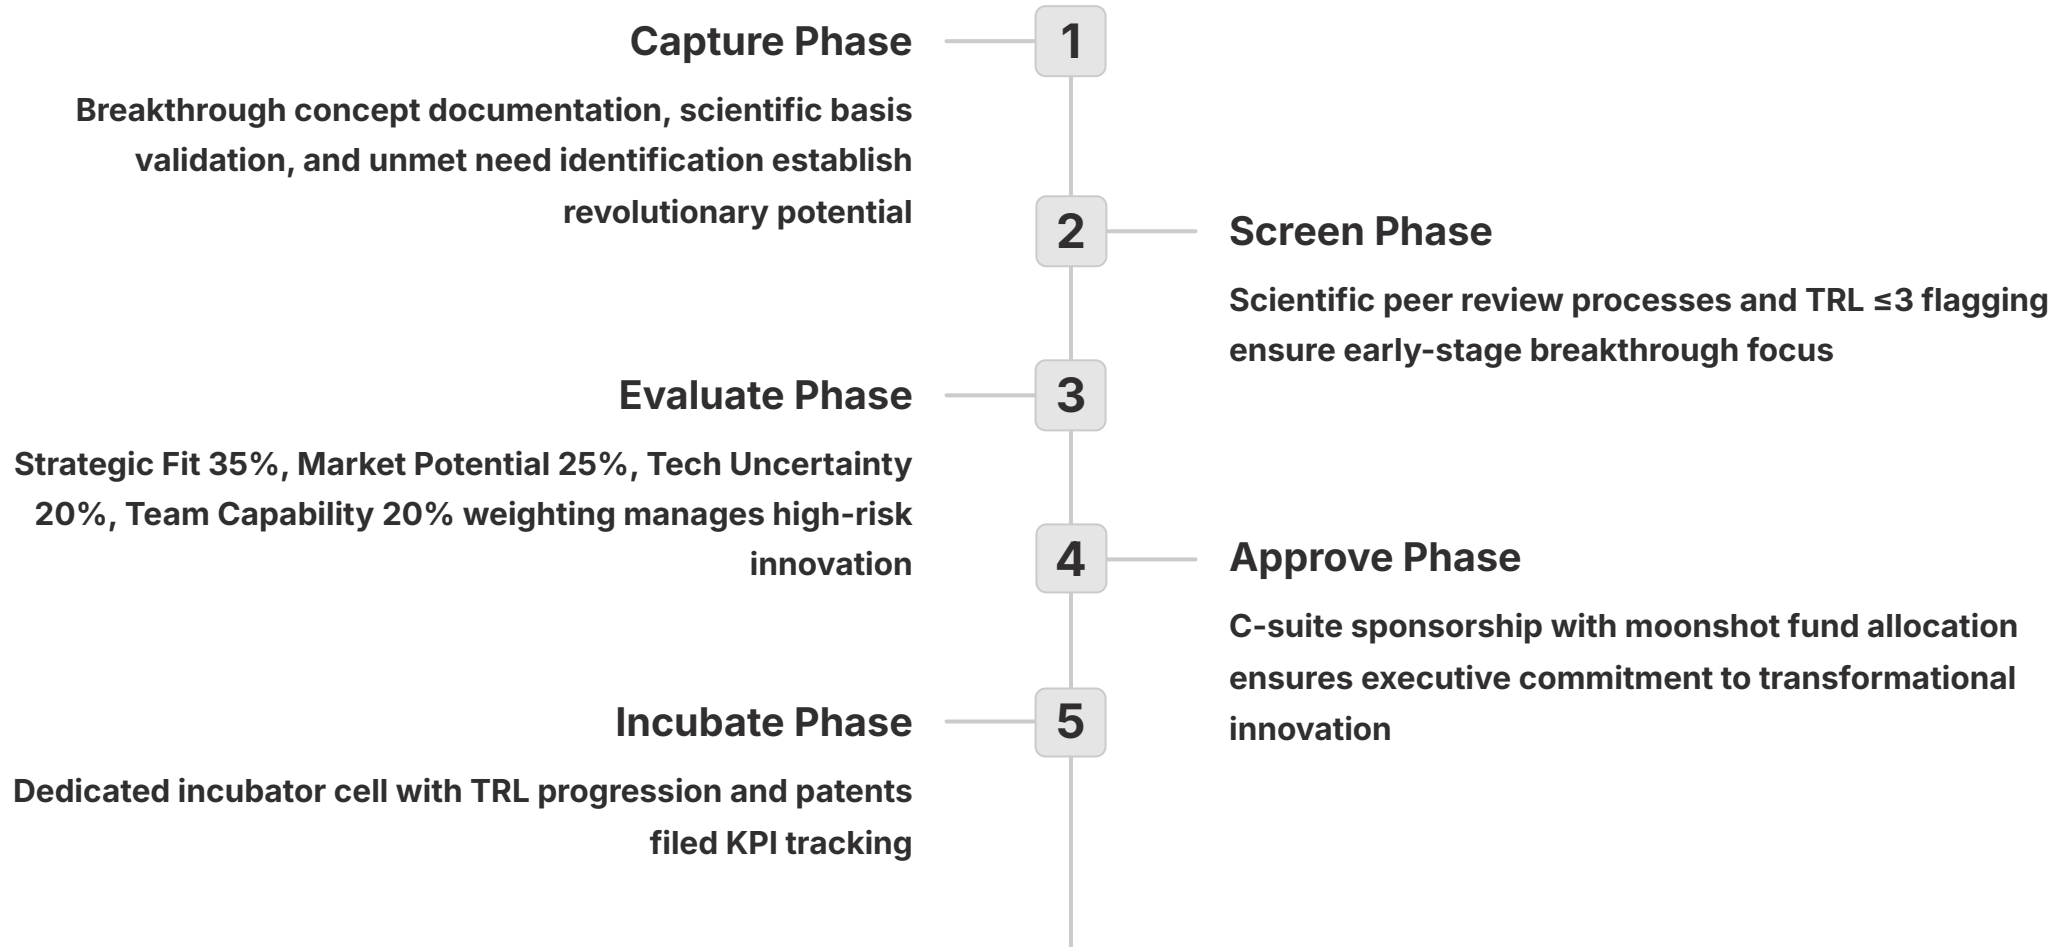

Disruptive Innovation Pipeline

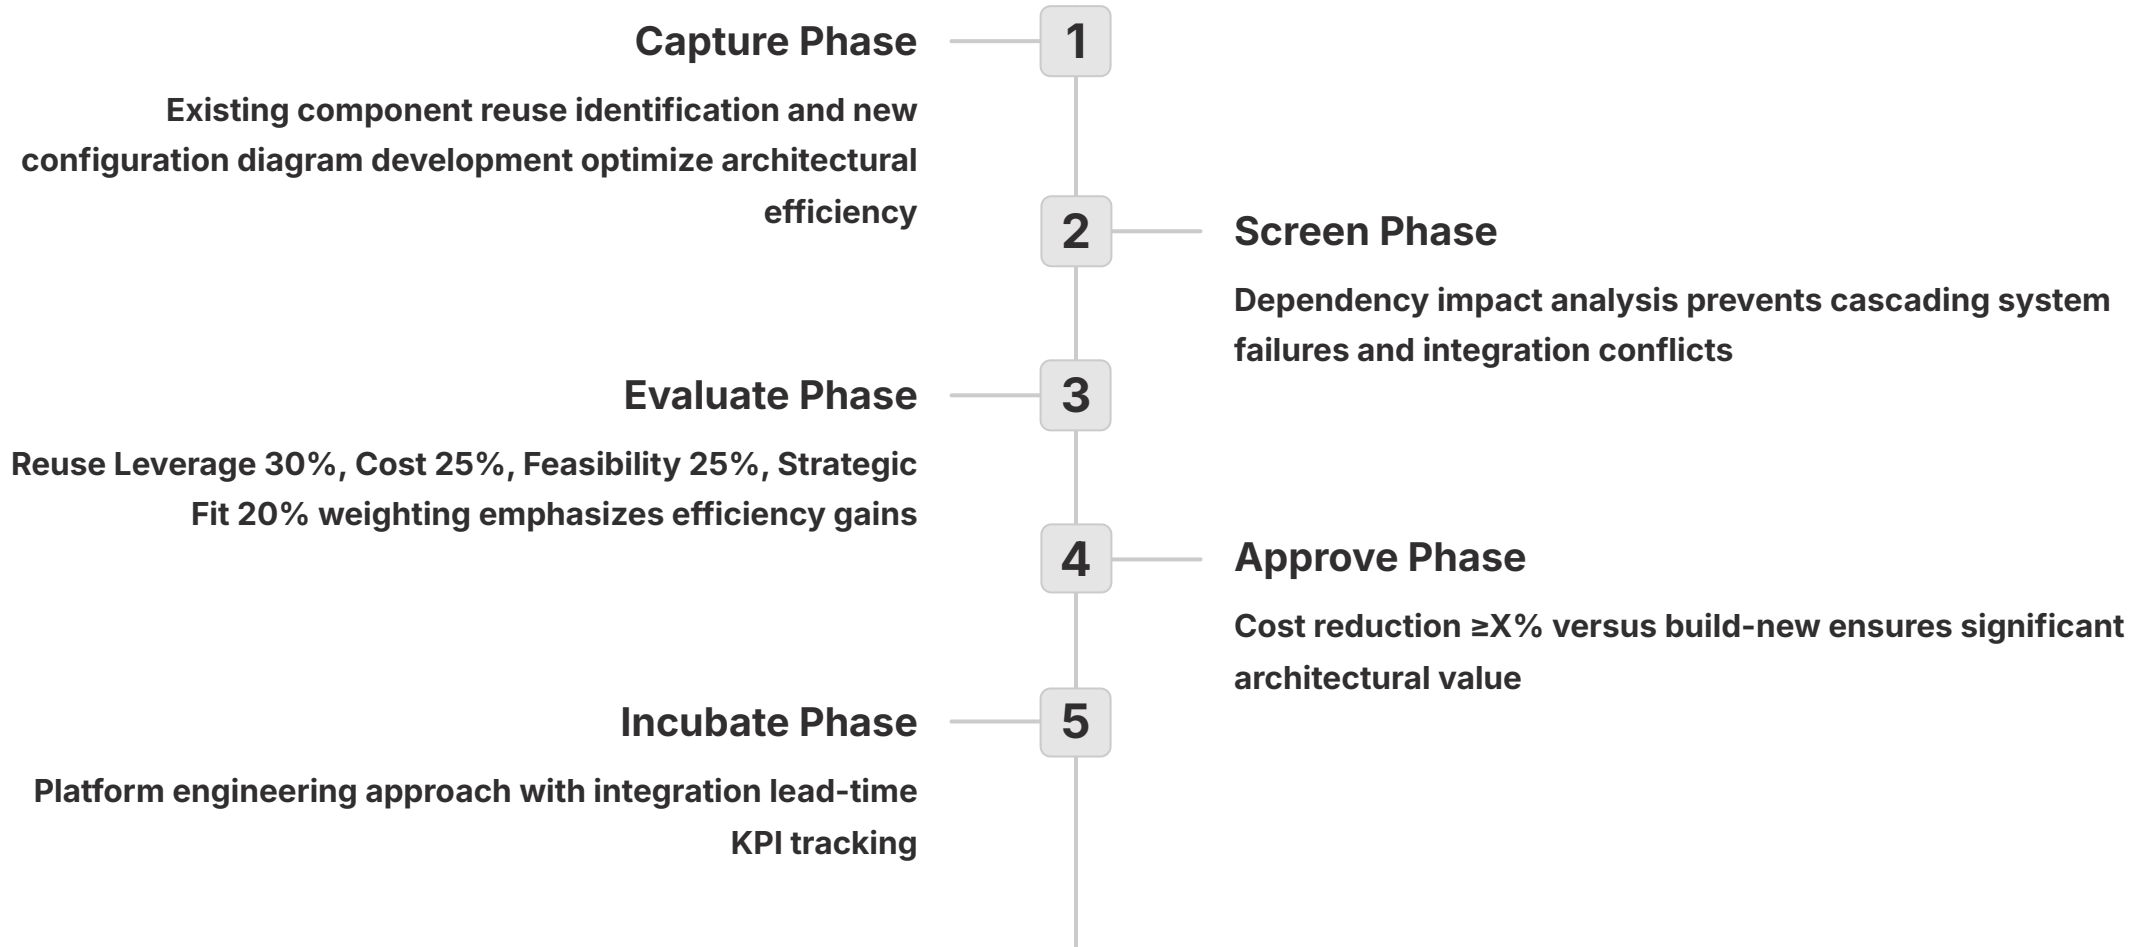

Radical Innovation Pipeline

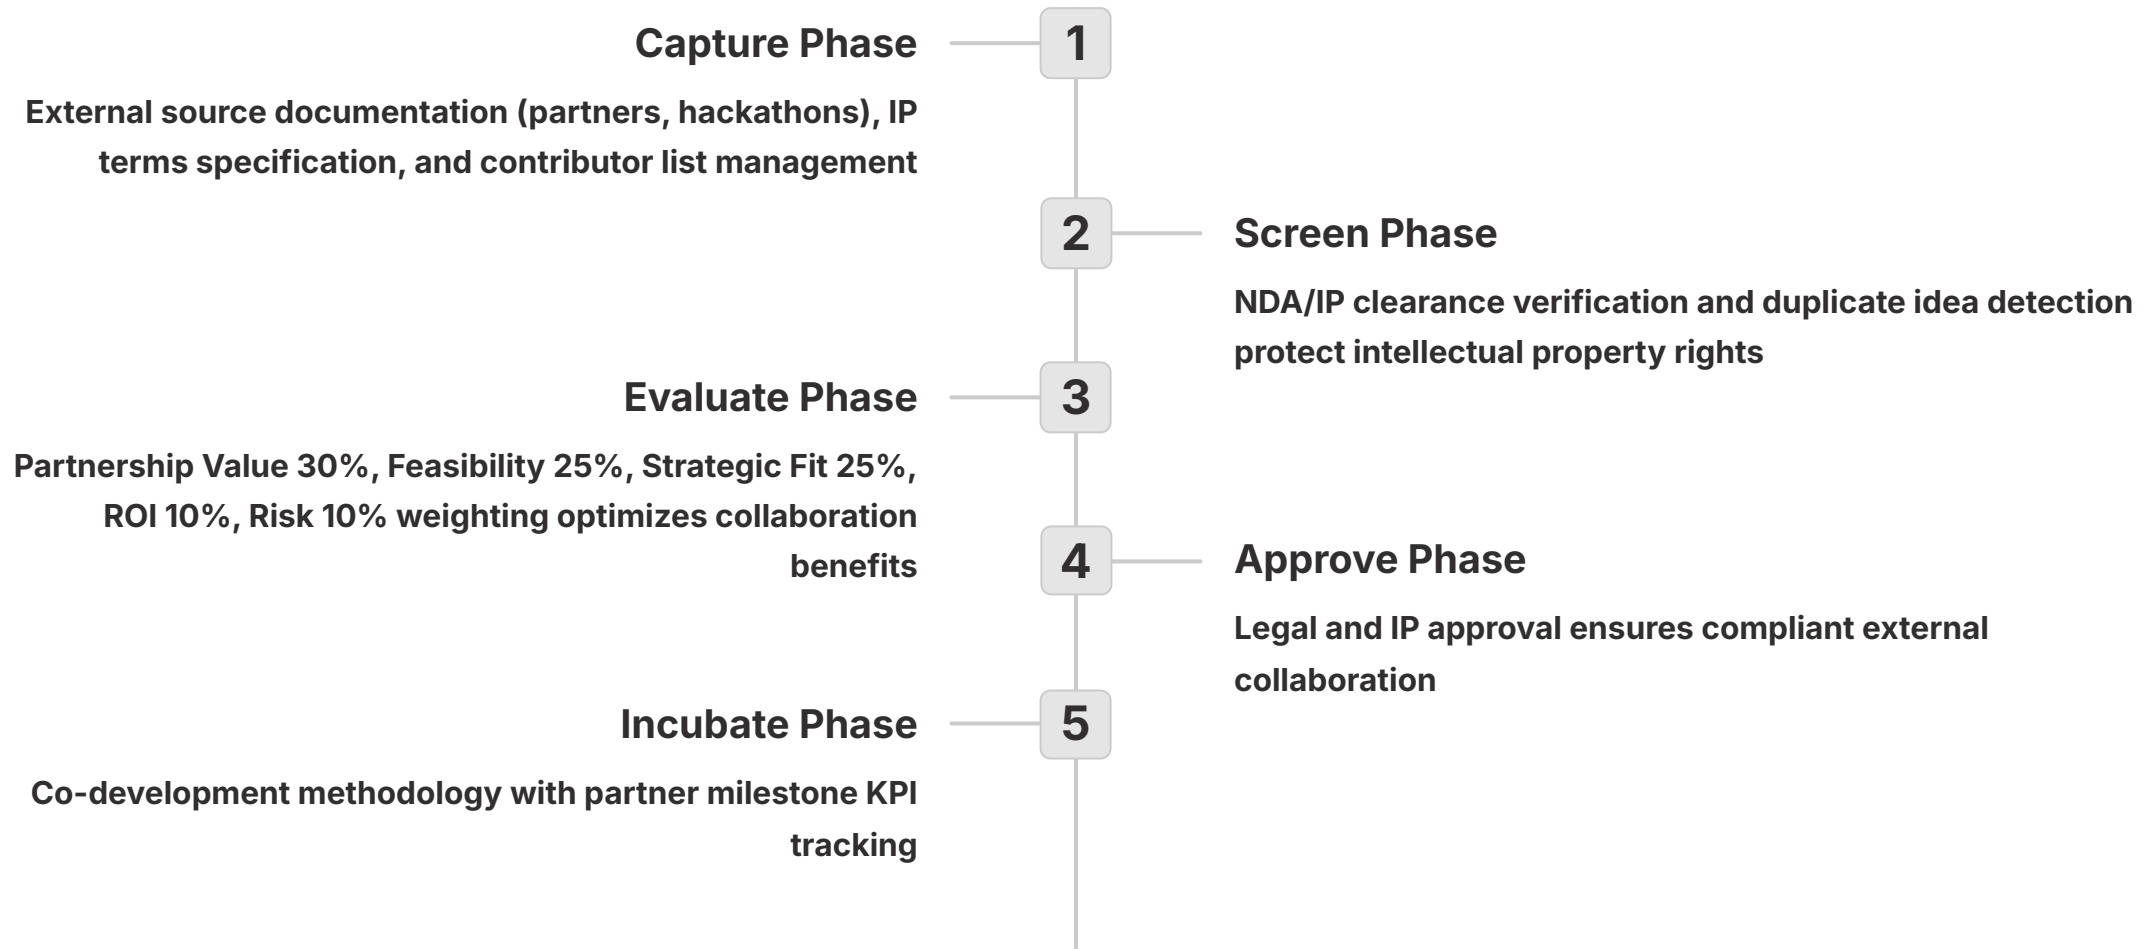

Architectural Innovation Pipeline

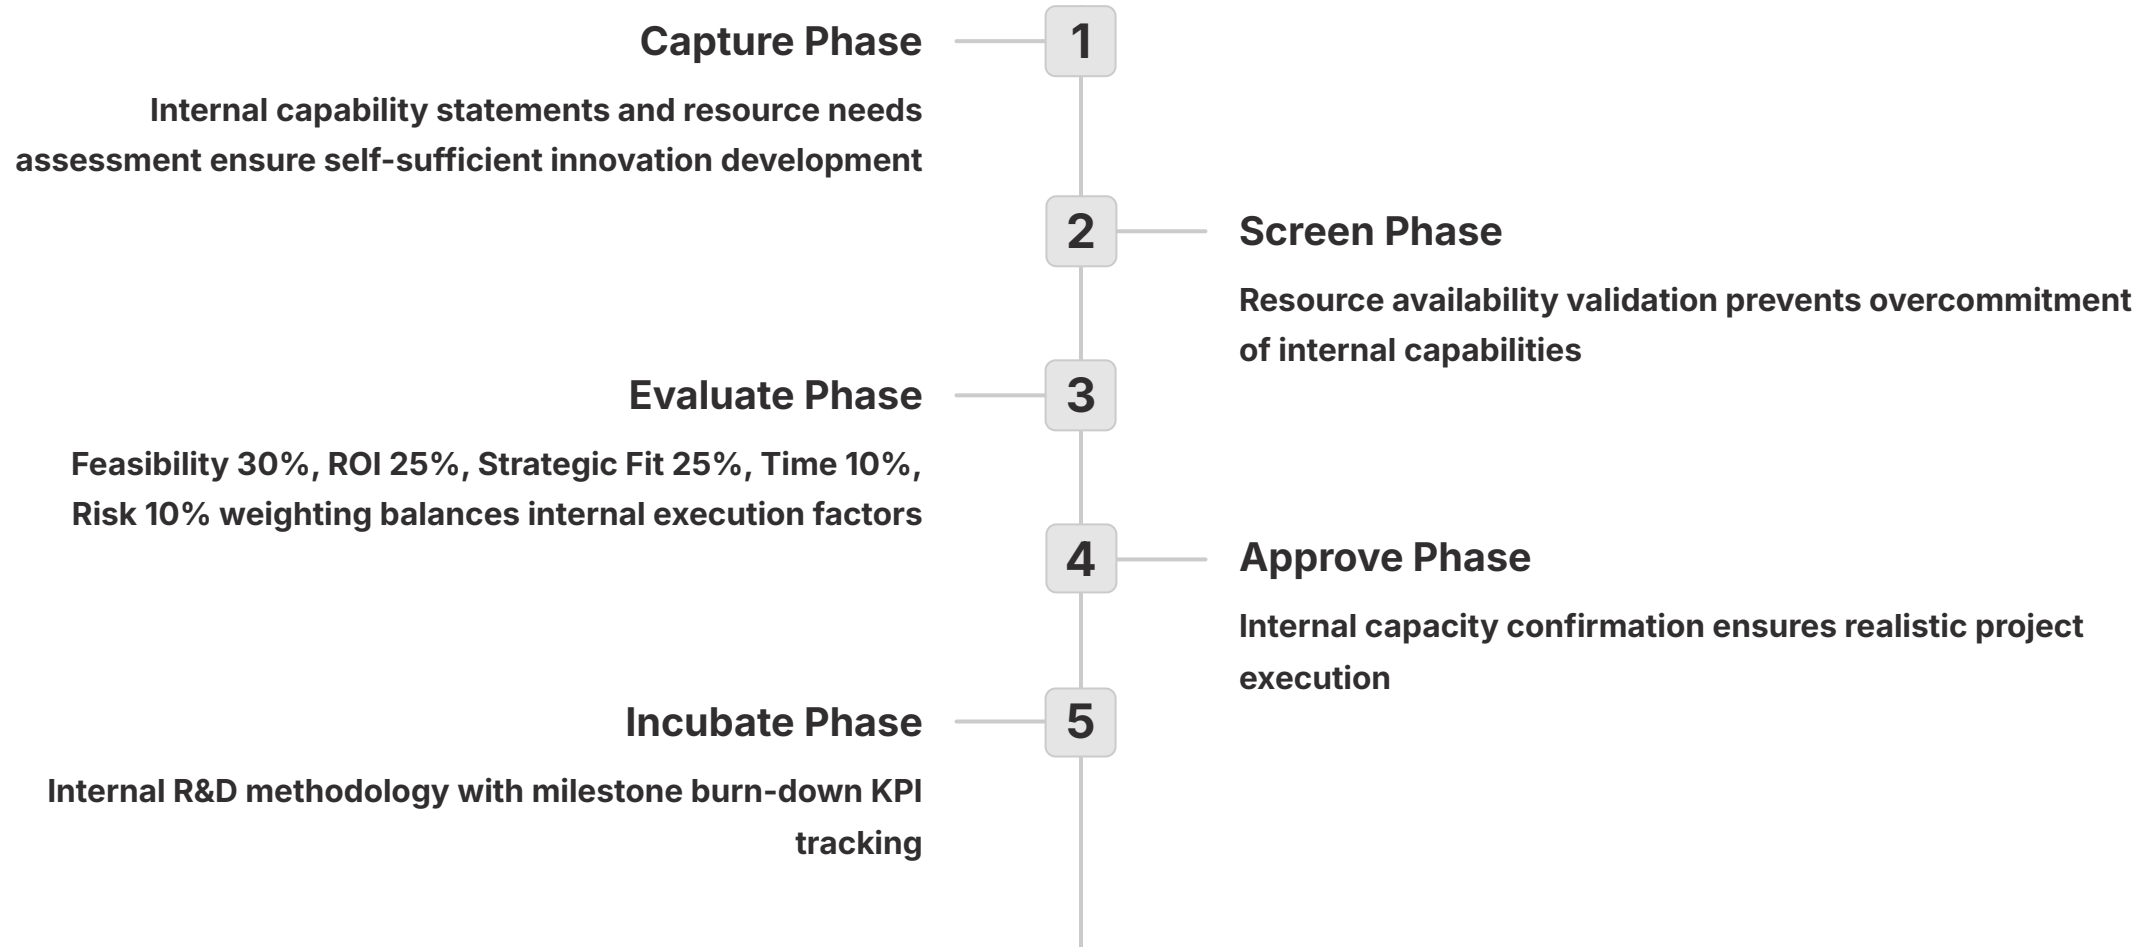

Open Innovation Pipeline

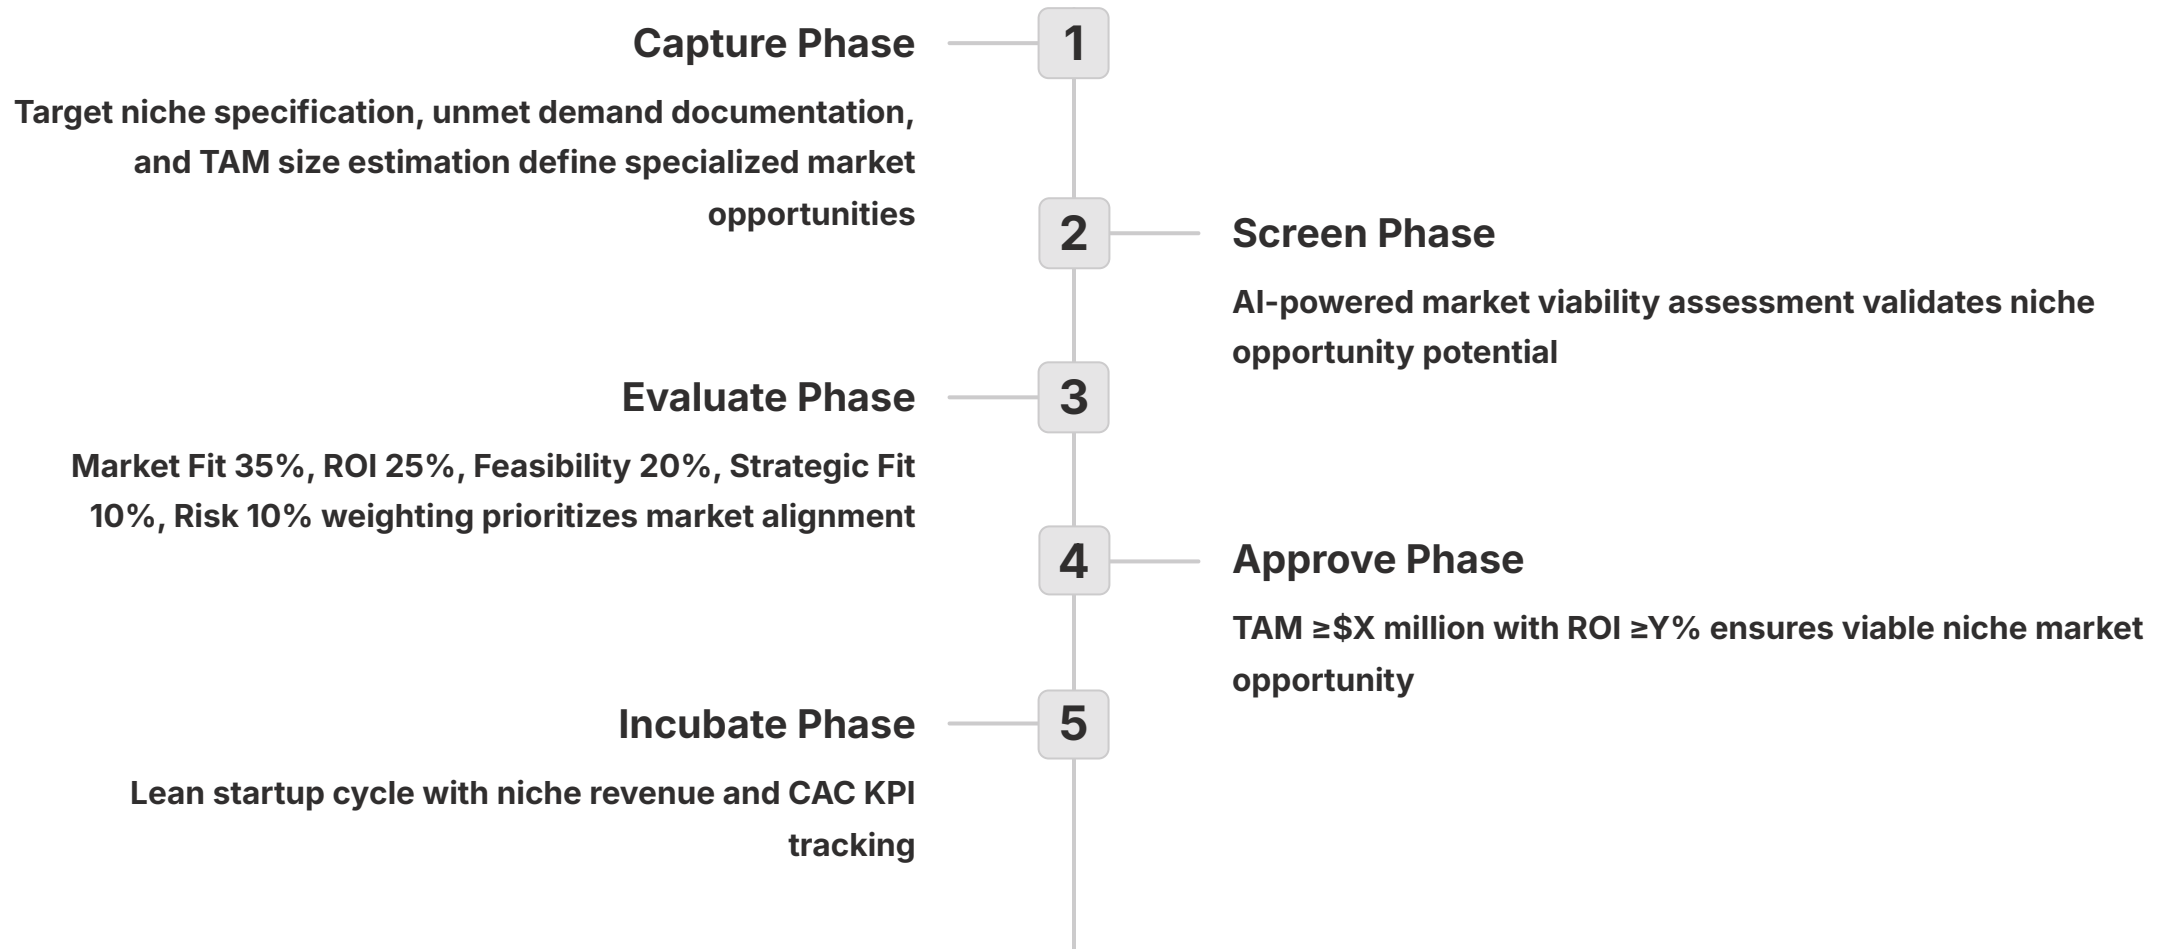

Closed Innovation Pipeline

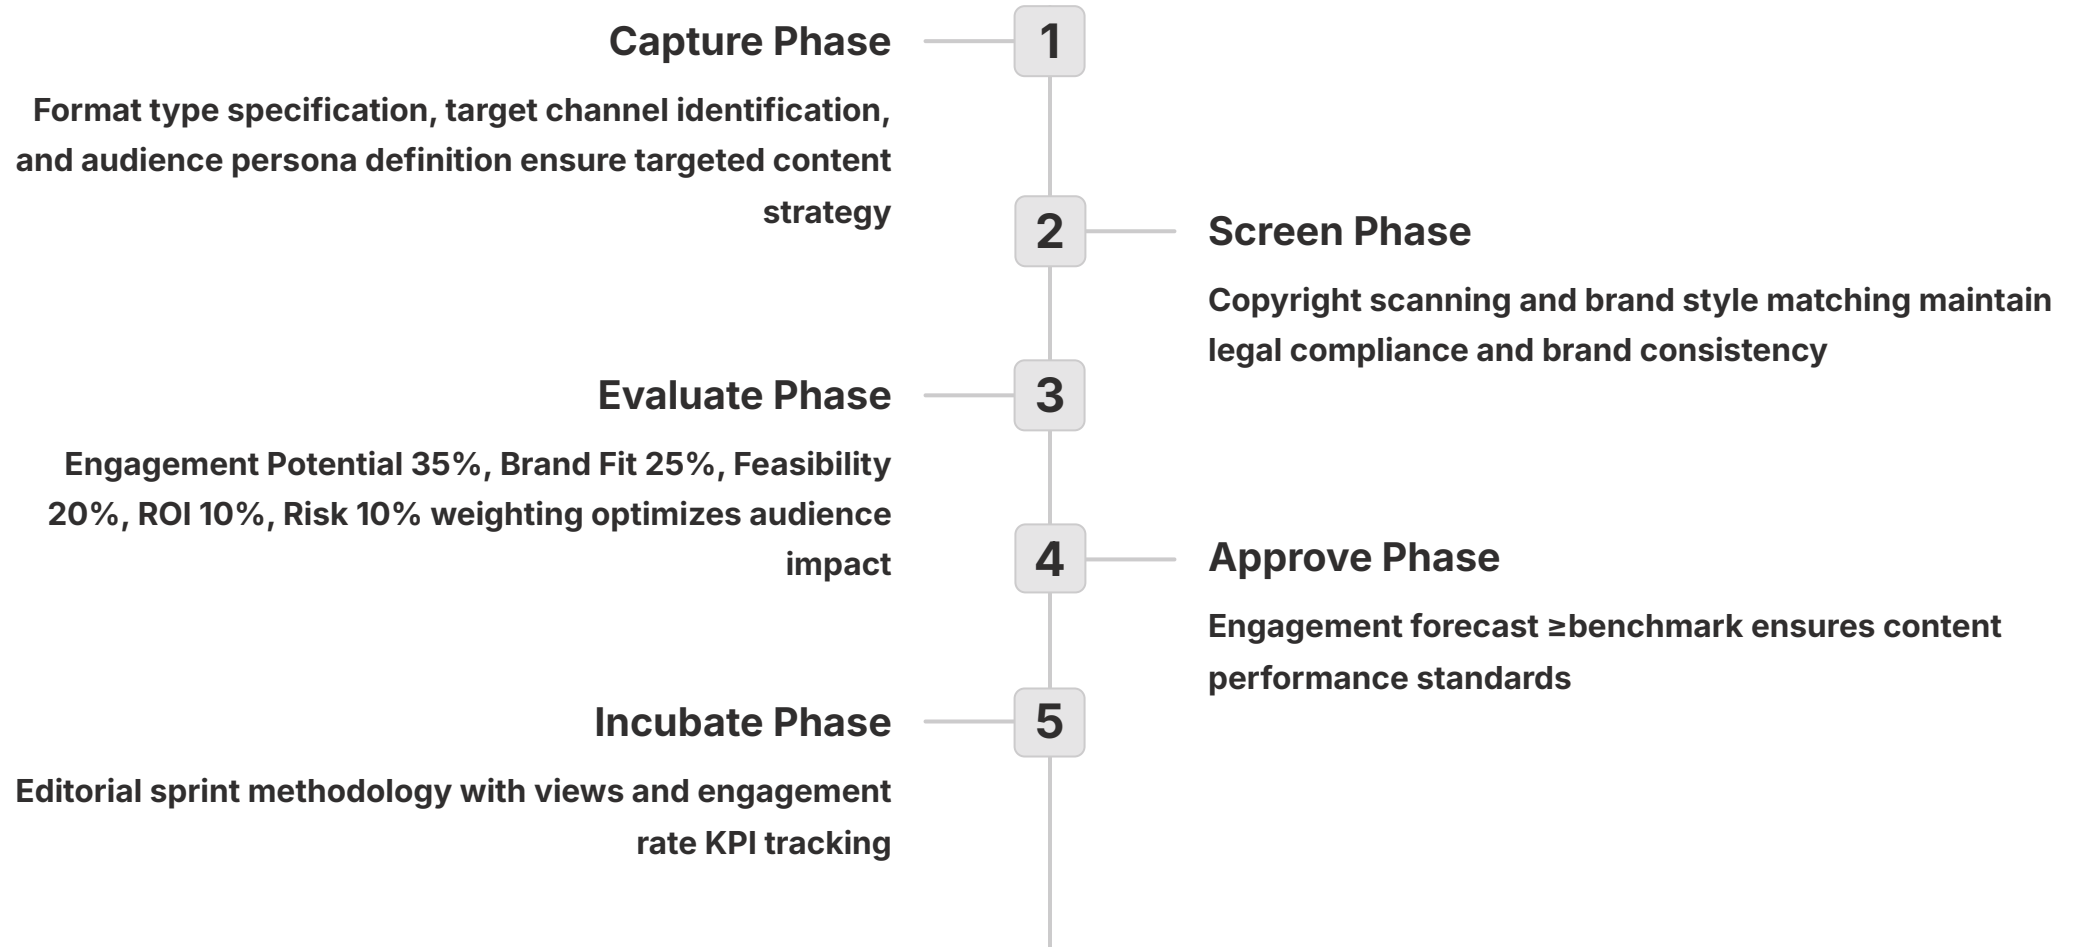

Niche Market Innovation Pipeline

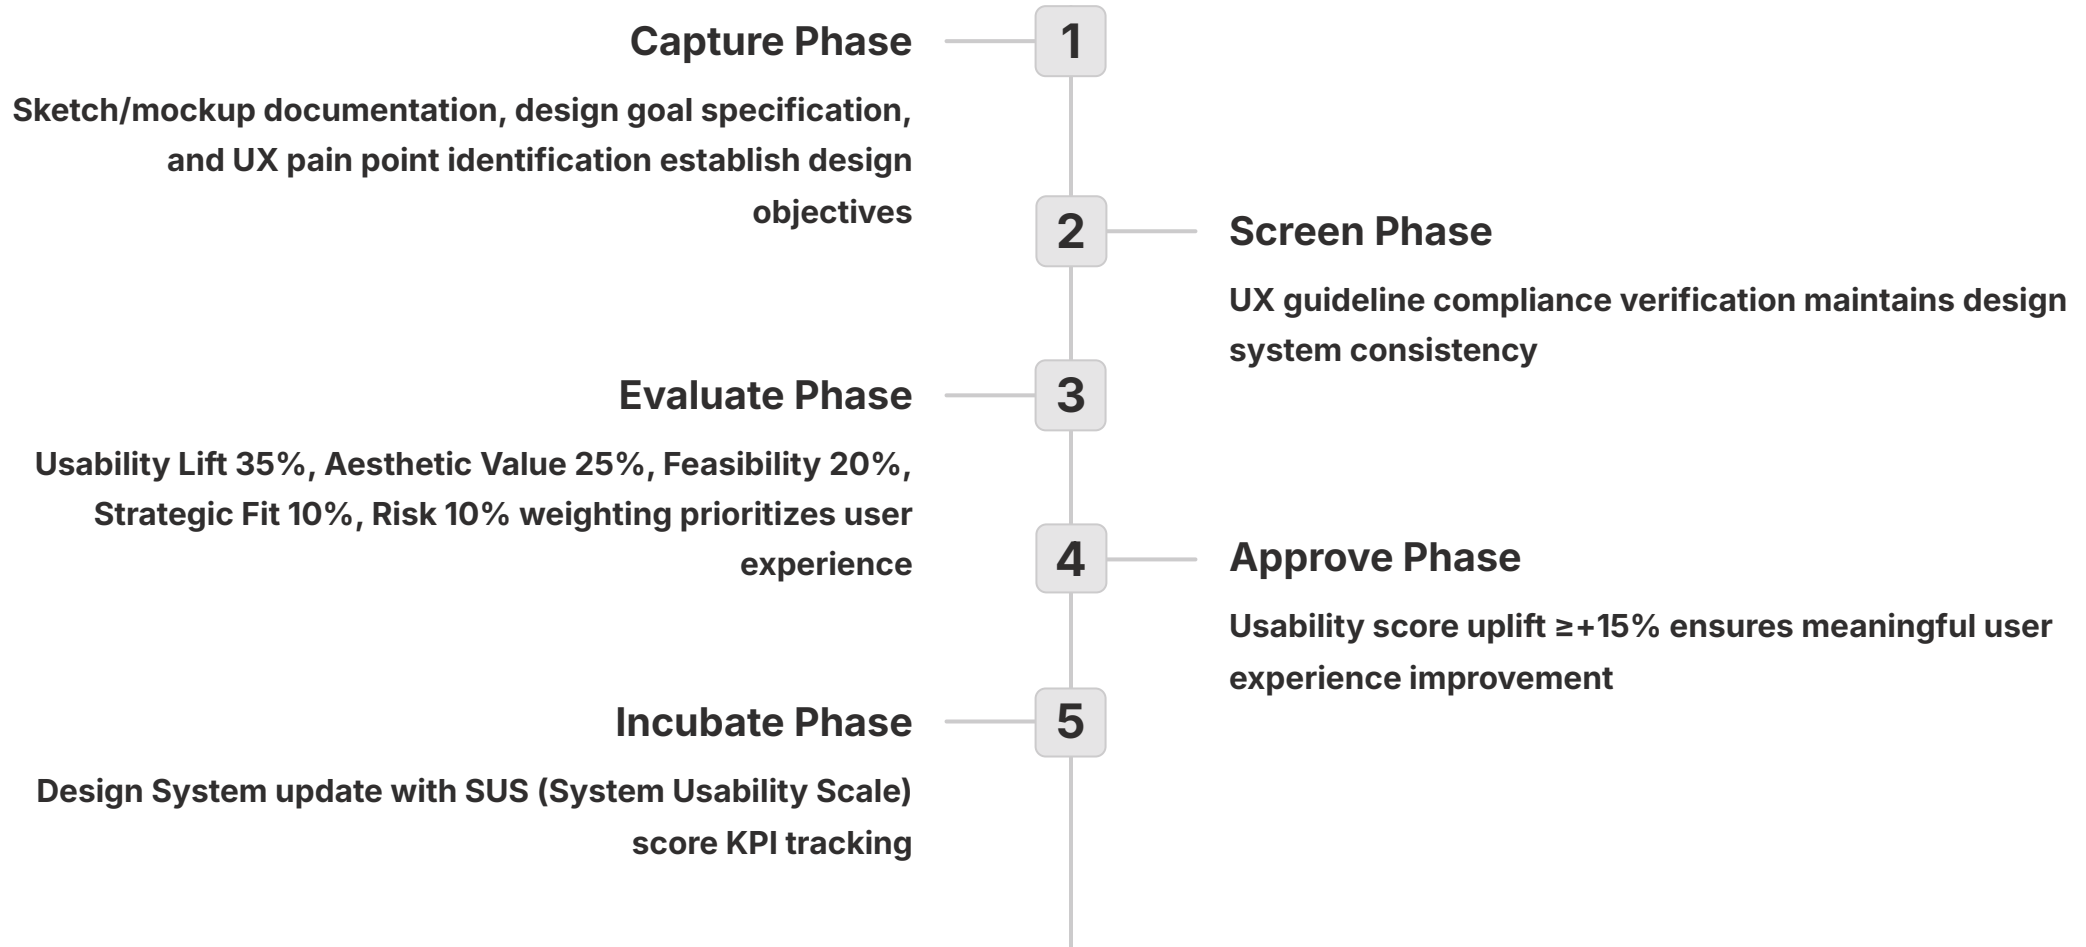

Content Innovation Pipeline

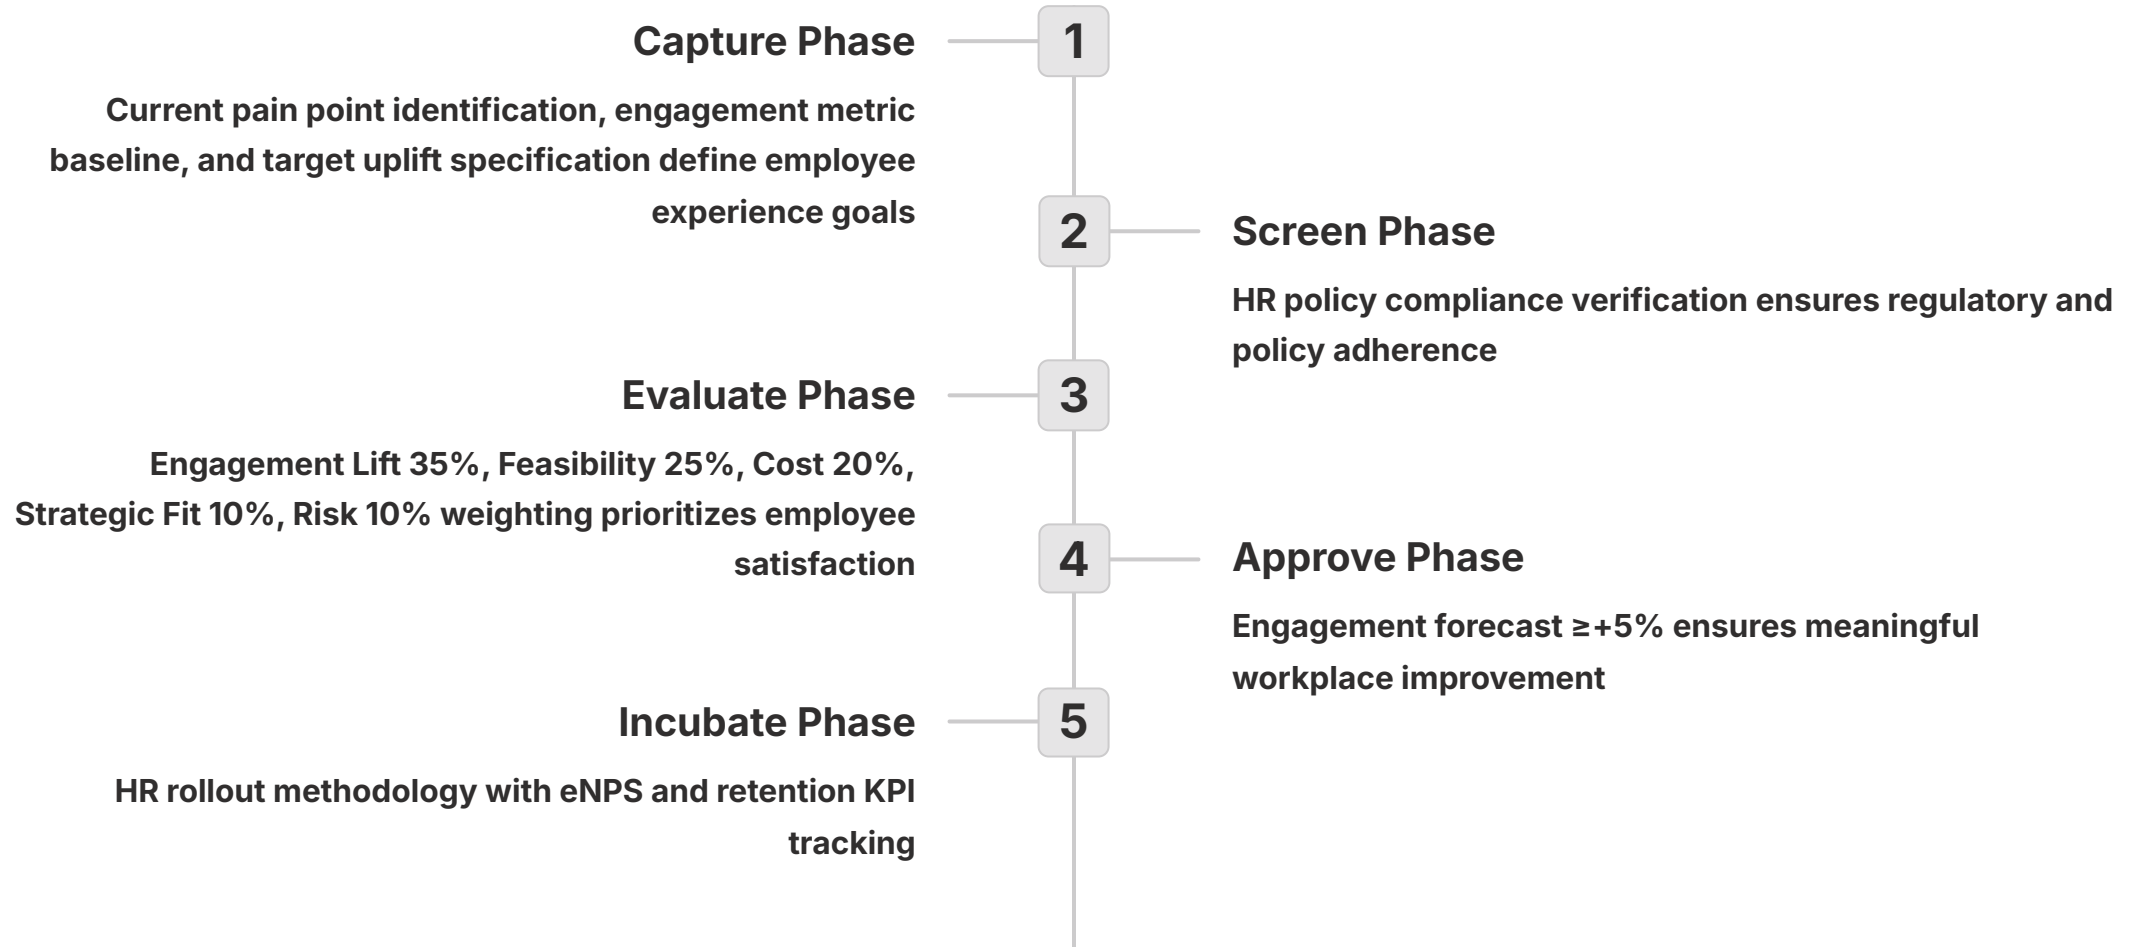

Design Innovation Pipeline

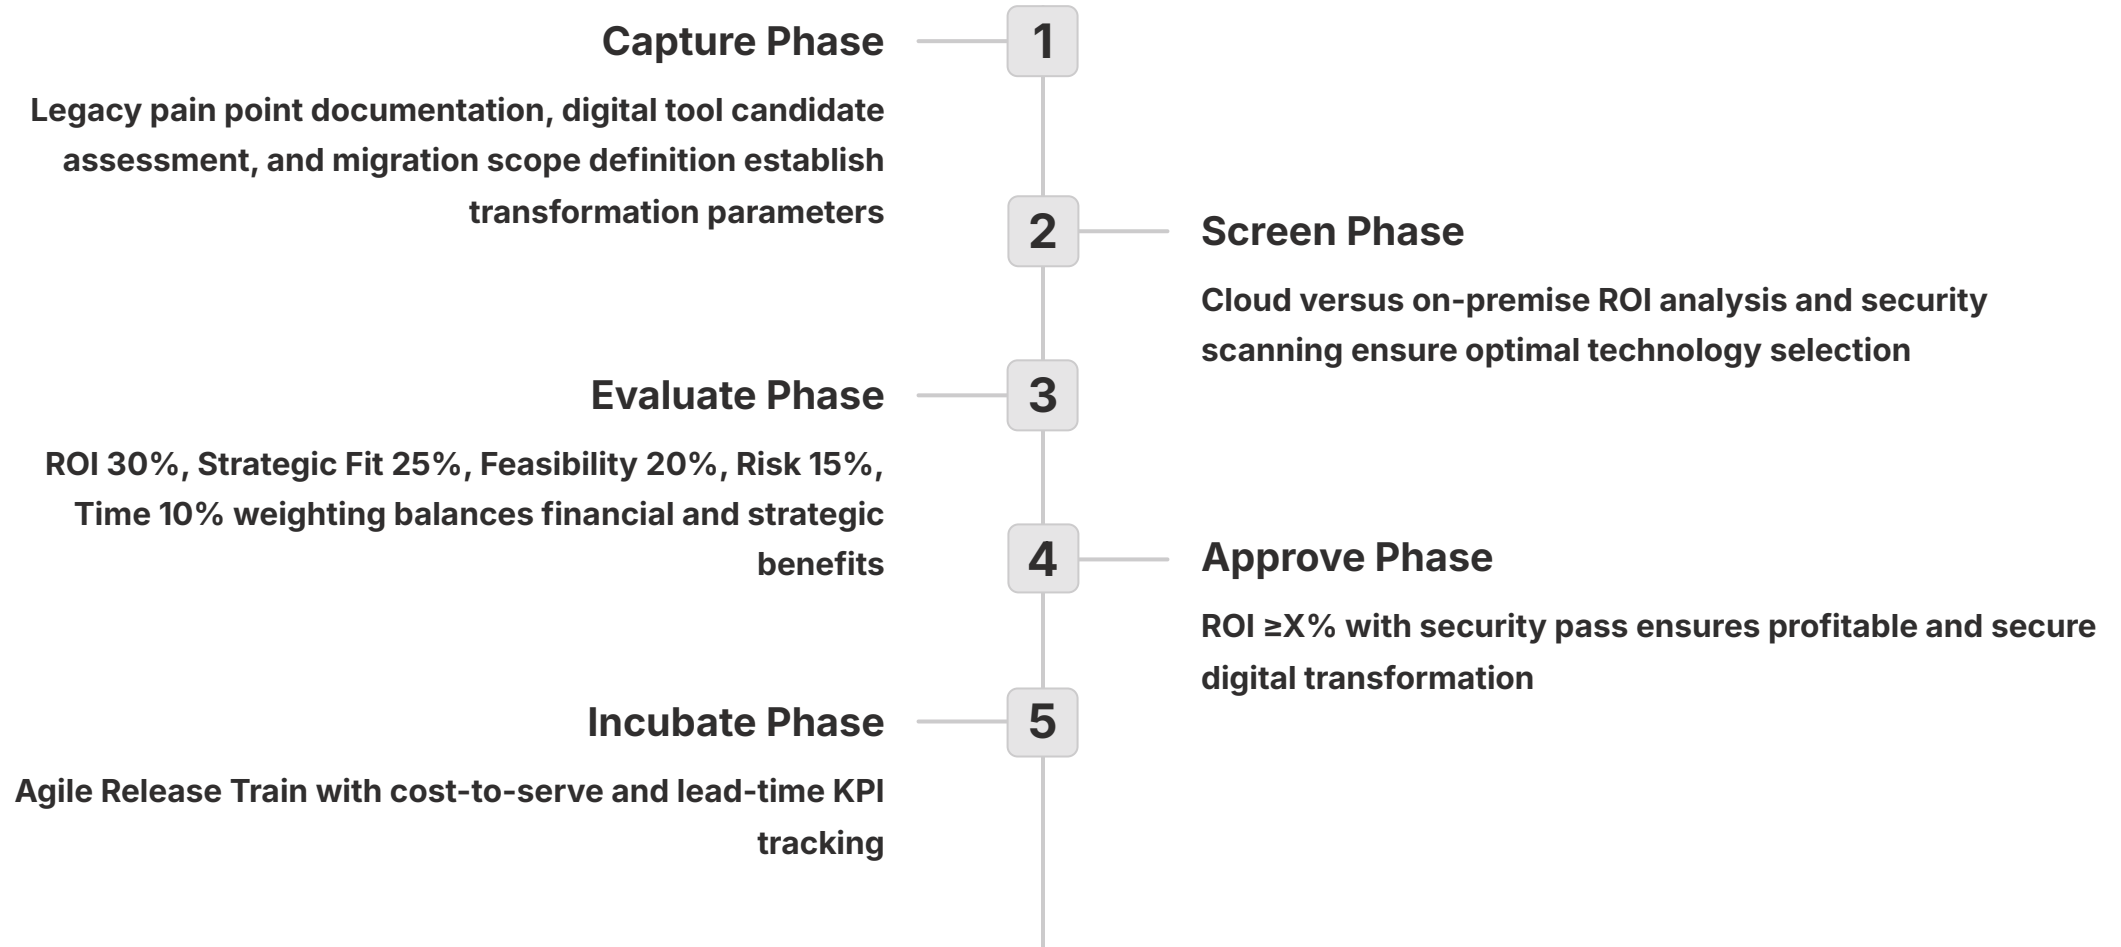

Employee Experience Innovation Pipeline

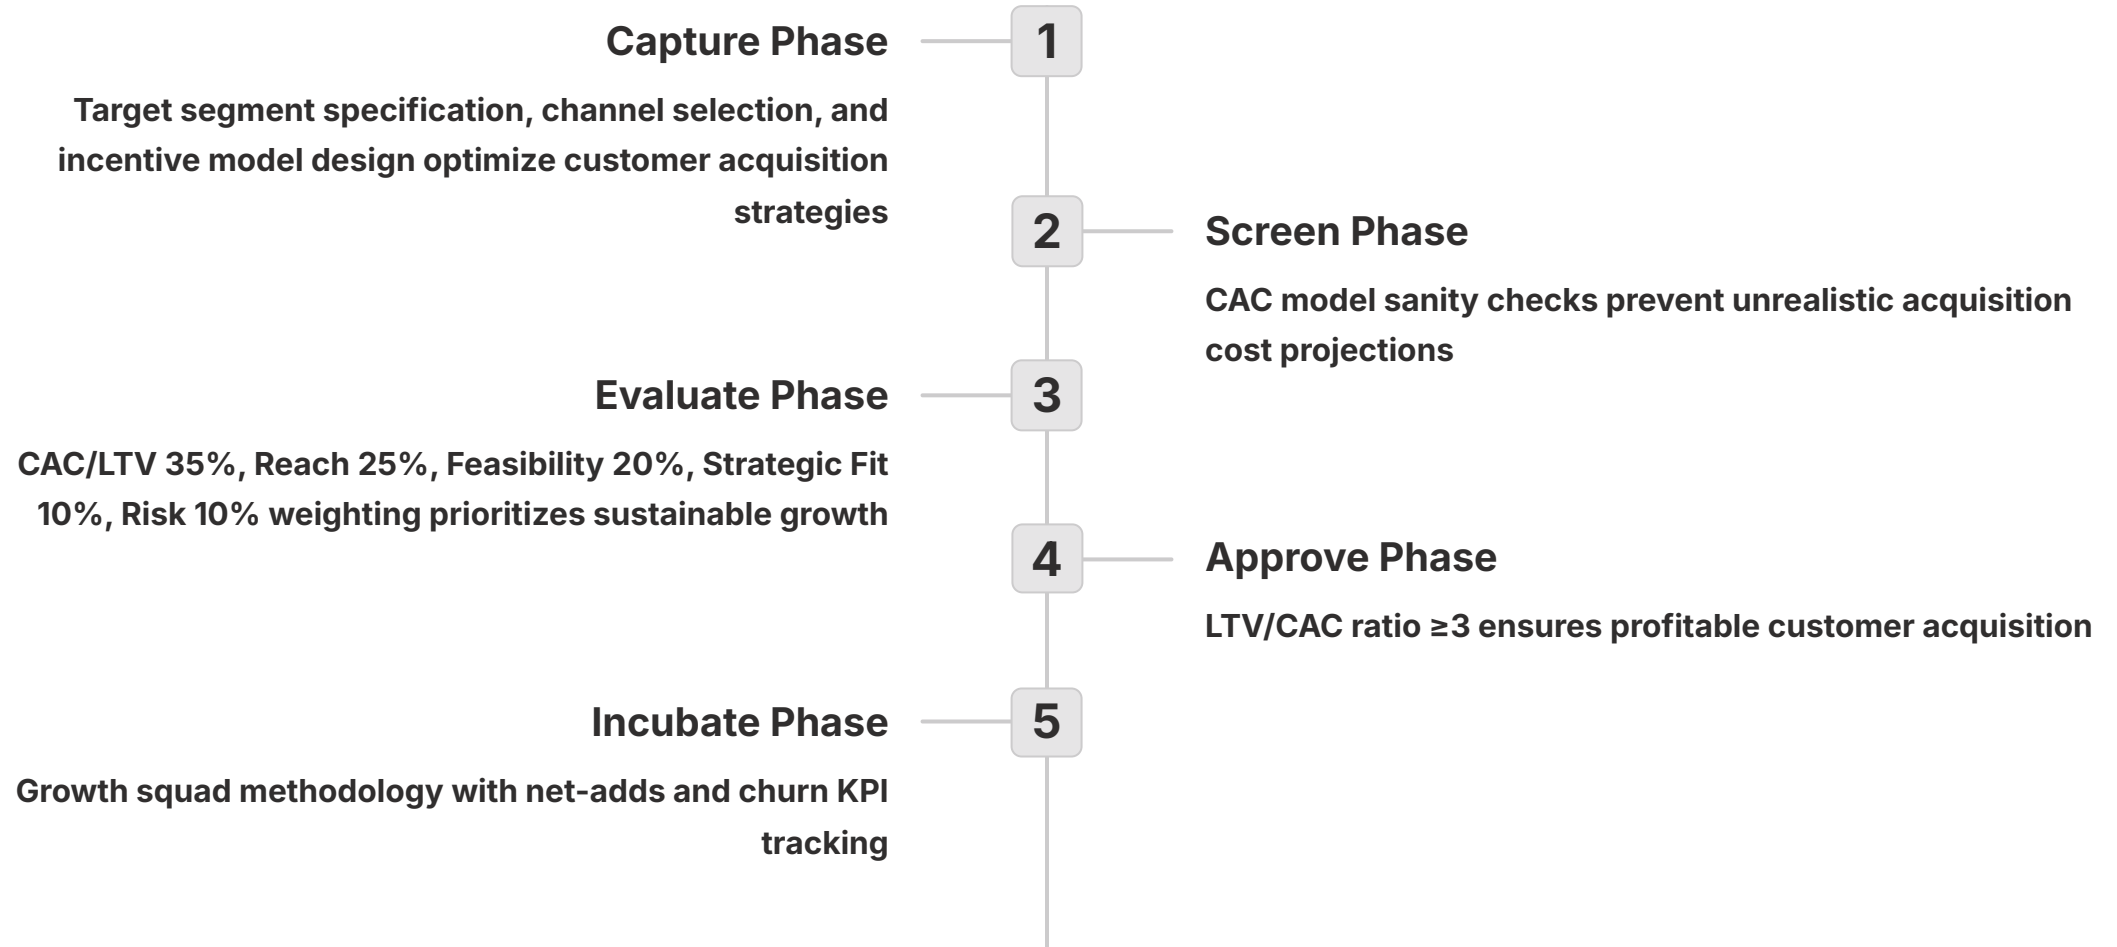

Digital Transformation Pipeline

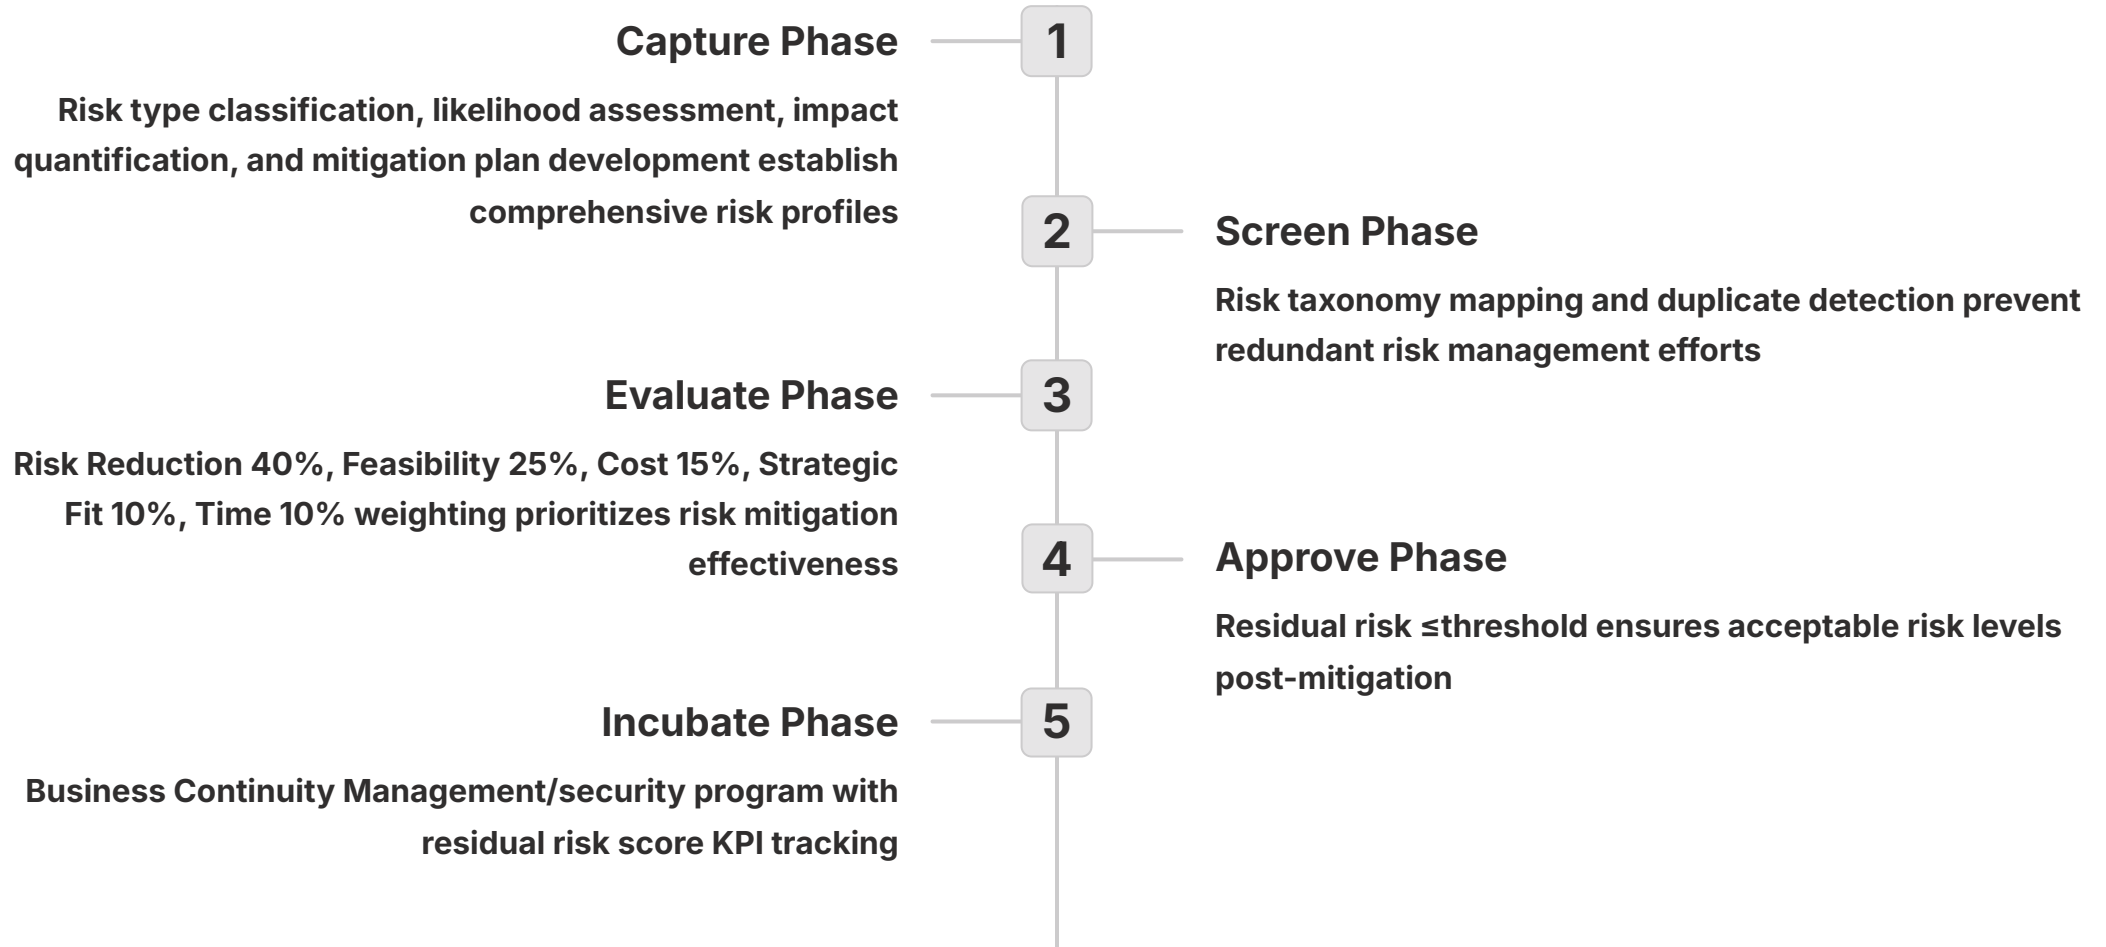

Customer Acquisition & Retention Pipeline

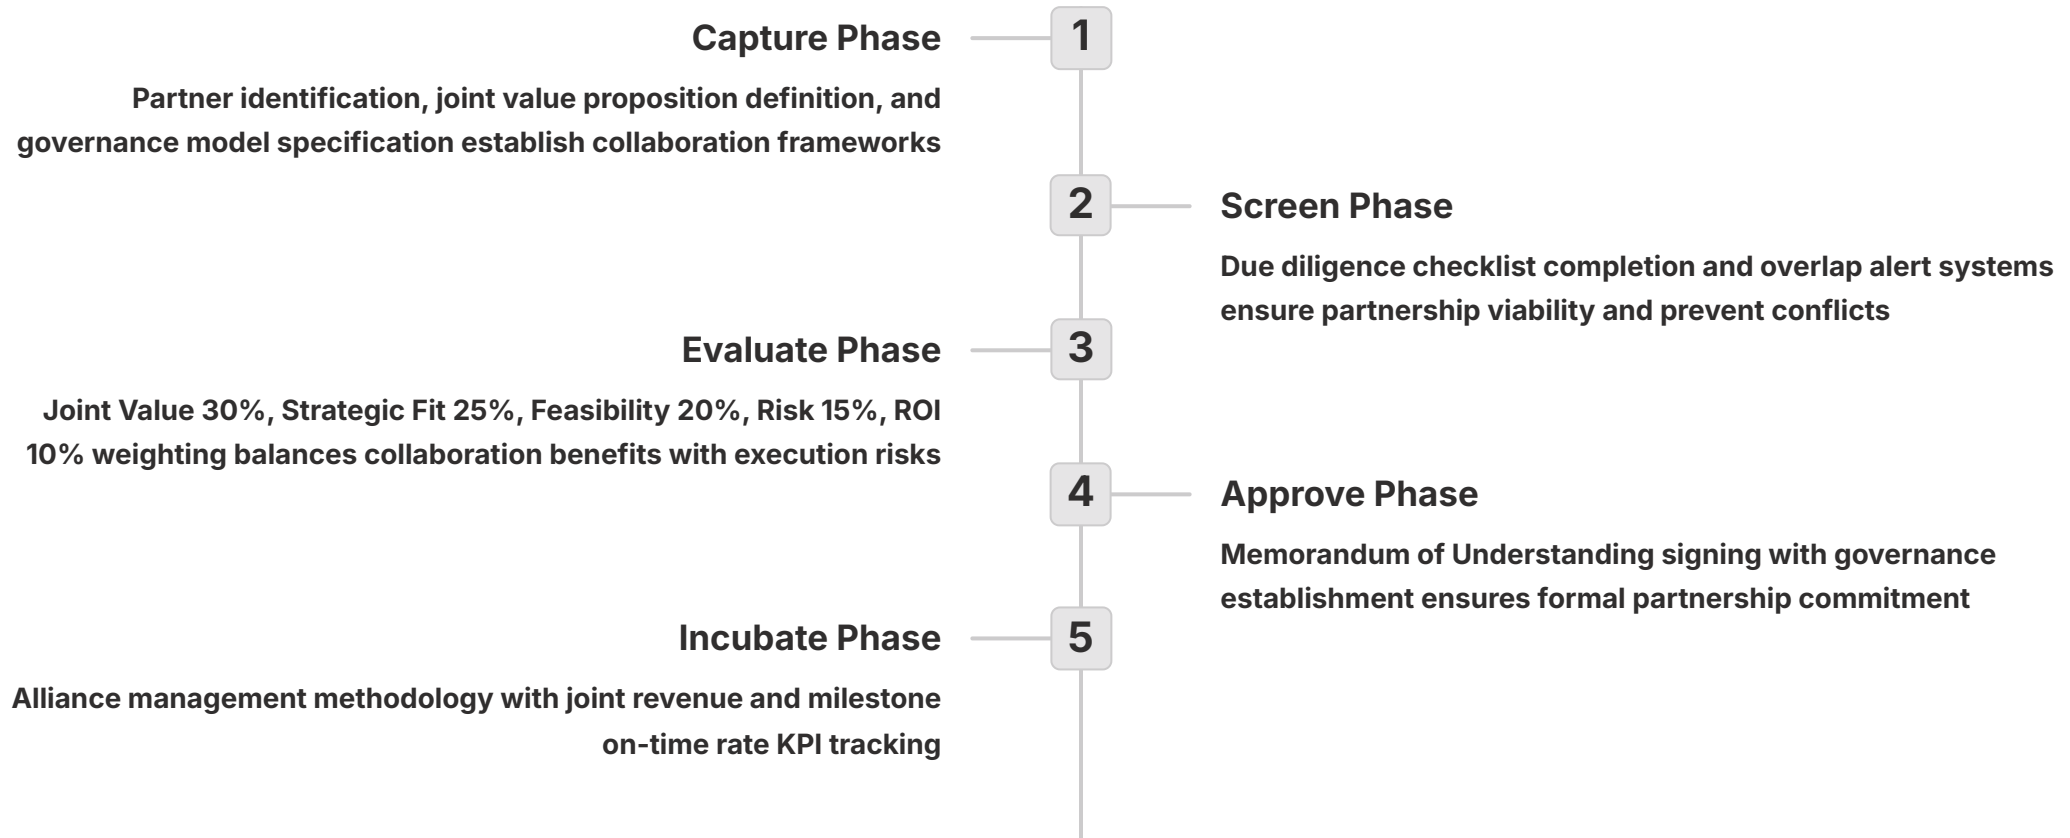

Risk Management & Resilience Pipeline

Partnership & Collaboration Innovation Pipeline

This comprehensive pipeline framework enables innovation managers to implement category-specific governance while maintaining portfolio-level visibility. Each category's specialized approach optimizes evaluation criteria, approval thresholds, and incubation methodologies for maximum innovation success. The standardized structure facilitates cross-category learning and best practice sharing across the innovation portfolio.
